## 49 EXHIBITIONS

---

51 ARTIFICIAL | City of Experiences  
George Brown College, Canada

---

54 LANGUAGES | Post collaboration  
as a form of counter-culture: The  
birth of new languages  
University of Johannesburg,  
South Africa

---

57 LIFE | Design for social problems  
in Mexico: living with disabilities  
Autonomous Metropolitan  
University, Azcapotzalco, Mexico

---

60 MAKING | New Textile  
Topologies: Experiments at the  
intersection of surface, textile  
and form  
The Swedish School of Textiles,  
Sweden

---

63 MULTIPLICITY | Self-Acceptance  
to Self-Indulgence  
Pearl Academy, India

---

66 NEW NORMAL | Expedition 2  
Degrees  
Zurich University of the Arts

---

---

69 PROXIMITY | Newcomers: Design  
for Immigrants  
Pratt Institute's School of Design,  
USA

---

72 RESILIENCE | Designing for  
Resilience: Creating new  
possibilities for industrial cities  
University of Monterrey, Mexico

---

75 REVOLUTION | UFØ Drift: In  
Search of Practice  
ArtEZ University of the Arts  
Arnhem, Netherlands

---

78 THINKING | Design and  
awareness: user meeting  
ESDAP Catalunya, Spain

---

## 81 DESIGN CULTURE (OF) ARTIFICIAL

---

83 A participated parametric design  
experience on humanoid robotics  
Francesco Burlando, Xavier  
Ferrari Tumay, Annapaola Vacanti

---

99 A systemic vision for the common  
good : |C|A|S|E| Goods Mobility  
in the fourth industrial revolution  
Veneranda Carrino, Federica  
Spera

---

# CONTENTS

- 
- 117 **Activist Activated: Efficacies of AR Political Poster Design**  
Sarah Edmands Martin
- 
- 130 **Art, Design, and Mathematics: Software programming as artifice in the creative process**  
Carlos de Oliveira Junior, Eduardo Ariel de Souza Teixeira
- 
- 142 **Artificial Creativity – Hybridizing the Artificial and the Human.**  
Yael Eylat Van Essen
- 
- 156 **Artificial Intelligence is a Character? Exploring design scenarios to build interface behaviours**  
Andrea Di Salvo, Andrea Arcoraci
- 
- 168 **Becoming Janus: The Subversive Potential of Face Recognition Technologies**  
Romi Mikulinsky
- 
- 181 **Between digital and physical. Envisioning and prototyping smart material systems and artifacts from data-informed scenarios.**  
Stefano Parisi, Patrizia Bolzan, Mila Stepanovic, Laura Varisco, Ilaria Mariani
- 
- 199 **Consensual (Design) Fictions: co-creating iterative use cases to define technology conceptualization**  
David Hernández Falagán, Andreu Belsunces Gonçalves, Kevin Koidl
- 
- 215 **Design of robotic for superhuman tasks**  
Fabrizio Formatì
- 
- 227 **Design, space management and work tools: enhancing human work in transition to Industry 4.0**  
Luca Casarotto, Pietro Costa, Enrica Cunico
- 
- 237 **Designers' skills for Social Robotics**  
Maximiliano Romero, Giovanni Borga, Rohan Sashindran Vangal, Francesco Baldassarra
- 
- 251 **Designing for the future by understanding evolving culture based on advancing technology and the changing behaviours that accompany it.**  
Nayna Yadav
- 
- 264 **Designing Somatic Play for Digital Natives through a Body-centric Design Process**  
Seçil Uğur Yavuz, Kristi Kuusk, Michaela Honauer
-

# CONTENTS

- 
- 279 Designing unpredictable futures. An anthropological perspective on the algorithmical prediction of human behaviour  
Giovanna Santanera, Roberta Raffaetà
- 
- 290 Digital Creativity Tools Framework  
Marita Canina, Carmen Bruno
- 
- 304 Digital tools that support students to reflect on their design competency growth paths  
John Fass, Job Rutgers
- 
- 316 Domestic AI and Emotional Involvement. Design Perspectives  
Mauro Ceconello, Martina Sciannamé, Davide Spallazzo
- 
- 328 Empowered by Code, to act in real word  
Alfredo Calosci
- 
- 339 Exploring Digital Inequalities: How Welfare States are disappearing behind an AI  
Paola Pierri
- 
- 349 From Decoration to Functionality — Research on smart accessories design in the Internet era  
Qingman Wu
- 
- 360 From the evaluation of acceptability to design of an assistive robot for elderly  
Francesca Tosi, Mattia Pistolesi, Claudia Becchimanzi
- 
- 376 Future heritage and heritage futures. A design perspective on the activation of Digital cultural heritage stored in archives  
Margherita Tufarelli
- 
- 386 Going beyond the problem of privacy: individual and social impacts of the use of personal information in connected services  
Laura Varisco
- 
- 400 Human and Artificial Intelligence for the Cultural Reform of Design  
Elena Laudante, Mario Buono
- 
- 412 Human Sensibility, Robotic Craft: Toward Autonomous Stonework  
Tom Shaked, Karen Lee Bar-Sinai, Aaron Sprecher
- 
- 423 Interface takes command. Educational environments, tools and practices to face the new normal.  
Alessio Caccamo
- 
- 437 Intelligent Voice Assistants: A Review of User Experience Issues and Design Challenges  
Lucia Rampino, Sara Colombo
-

# CONTENTS

- 
- 449 Research on Gender Differences of Adult Head Shape in China  
Renke He, Wenxiu Yang,  
Wanshan Li, Haining Wang
- 
- 461 Speculative Physical Models Created Through a Robotic Process  
Sara Codarin, Karl Daubmann
- 
- 476 Teaching Design in the Age of Platforms: A Framework for Platform Education  
Xinyi Li
- 
- 488 The body as an artefact: a case of hand prosthesis  
Venere Ferraro, Silvia Ferraris,  
Lucia Rampino
- 
- 502 The design of human machine interfaces: from data to risk prevention.  
Annalisa Di Roma, Alessandra Scarcelli
- 
- 516 The Designer in the AI/Machine Learning Creation Process  
Frederique Krupa
- 
- 526 The encounter between Design and Artificial Intelligence: how do we frame new approaches?  
Marzia Mortati
- 
- 537 The Perceptual and Dialogical Form of Design between Time, Space and Technologies  
Camelia Chivăran, Sonia Capece
- 
- 552 The role of Design in telepresence robotics experience  
Claudio Germak, Lorenza Abbate
- 
- 565 The Venice Backup: Case studies on the use of Virtual Preservation Techniques on Architectural Heritage sites in Venice, Italy  
Kai Reaver
- 
- 587 Towards a visual-based survey on explainable machine learning  
Beatrice Gobbo
- 
- 604 Toys and Play, Weapons and Warfare: Militarizing the Xbox Controller  
Rachel Berger
- 
- 619 Wearing the smart city: Supporting older adults to exercise by combining age-friendly environments and tailored digital public data  
Nicole Aimers, Alen Keirnan, Ann Borda, Sonja Pedell
-

# CONTENTS

---

## 629 DESIGN CULTURE (OF) LANGUAGES

---

631 A Sidewalk museum. Exhibiting the collective dimension of the moving image  
Nicolo Giacomo Ceccarelli, Marco Sironi, Sabrina Melis

---

645 Abstract to figurative, and everything in between: visual design approaches and linguistic codes of a traditional form of animated product.  
Vincenzo Maselli, Eleni Mouri

---

659 Al-Kafiye: A Symbol of Change  
Hala Abdel Malak

---

688 Beyondstories. People Narrative makes a Territory  
Aureliano Capri, Valeria Michetti, Veneranda Carrino, Mauro Palatucci

---

707 Brand in Product. The language of the brand to govern complexity  
Mario Rullo, Massimiliano Datti

---

726 Creating Visual Identity as Constellation: Methodological Project for a Design Workshop  
Ximena Izquierdo, Magdalena Ballacey

---

---

754 Data visualization as a qualitative driver in knowledge communication: an interpretative framework  
Giulia Ciliberto

---

771 Design and Cultural Sites: New signage methods and languages for fruition, accessibility and storytelling  
Monica Oddone, Irene Caputo, Marco Bozzola

---

786 Design and the 'Magical magic'. Disney and history, perceived heritage and shared memory  
Luisa Chimenz

---

800 DEsign DEcide The sign  
Tsvetomira Girginova

---

811 Designing the Gross. In search for social inclusion  
Adrien Rigobello, Nadja Gaudillière-Jami

---

828 Finding New Representations of Old Knowledge: a design study of visualizing I-Ching  
Yvette Shen

---

843 Form is function. Ethics and aesthetics of digital technologies in inclusive interface design.  
Letizia Bollini

---

# CONTENTS

- 
- 852 'Graphicmance'. New Visual Languages between Design and Performance  
Giulia Scalera
- 
- 865 Inner Geographies as poetic-aesthetic knowing: the inspiration and manifestation of creative doings through an emotively-orientated sensory methodology  
Mizan Rambhoros
- 
- 883 Italian Pavillion at XXII Triennale di Milano  
Ilaria Bollati, Luisa Collina, Laura Daglio, Laura Galluzzo
- 
- 895 Language and identity in new Italian design  
Stefano Follesa, Peian Yao
- 
- 906 Metaphors as Knowledge Activators in Data Visualizations: the case of the Archipelago of Calvino's literary works  
Tommaso Elli, Maria de los Angeles Briones Rojas, Beatrice Gobbo, Margherita Parigini, Virginia Giustetto, Valeria Cavalloro, Michele Mauri
- 
- 925 Patient Autonomy Indicators: a knowledge visualization tool for patient autonomy support  
Wen Zhang, Yuan Liu, Li Hou
- 
- 938 Performativity as a language of sense-making for cultural service in local museum  
Shu Hongming, Eleonora Lupo
- 
- 950 Solid perspectives and optical corrections of spaces in graphic & architectural design  
Tommaso Empler
- 
- 962 Spatial construction for ideational meaning: An analysis of interior design students' multimodal projects.  
Andrew Gill, Giovanna Di Monte-Milner
- 
- 976 Tales of Surprise: Exploring Sense Making Processes Through User Narratives  
Miray Hamarat, Ozge Merzali Celikoglu
- 
- 992 The Design of Politics: Understanding the Arrest of Cesare Battisti Through the New Media Factor  
Noemi Biasetton
- 
- 1007 The Enlightenment of the Contemporary Transformation of Chinese Traditional Visual Space Perception on Cultural Sustainability design for all  
Jixiang Jiang, Dong Tao
-

# CONTENTS

---

1021 The Interplay between Ethics and Aesthetics in Intelligent Systems-Users Interaction  
Gabriele Barzilai

---

1034 The pluralistic aesthetics of nowadays design  
Francesca La Rocca

---

1049 The role of vernacular typography in the linguistic landscape of multicultural Singapore: A multimodal analysis case study of a gentrified street  
Min-Yee Angeline Yam

---

1063 The Threshold of Language: Design and Soma  
Daniela Monasterios-Tan, Susan Sentler, Ginette Chittick

---

1082 Towards a new design culture of scientific production – Innovating the formats of scientific publication of design  
Eleonora Lupo, Beatrice Gobbo, Emilio Lonardo

---

1098 Translation Design for medicine leaflets. Research and innovation.  
Elena Caratti, Antonella Penati, Valeria Bucchetti

---

1115 Visual dialects. Exploring early design sketching in various design disciplines  
John Daniel Öhrling, Åsa Wikberg-Nilsson

---

---

1127 Visualizing Offshore Foreign Direct Investments: The Atlas of Offshore  
Michele Mauri, María De Los Angeles Briones Rojas, Jonathan Gray, Daniel Haberly, Chris Anderson

---

1144 What does this symbol mean? Icons as a Language for Emergency  
Rodrigo Ramirez

---

1159 Where methods meet form  
Meret Ernst, Maya Ober

---

---

## 1175 DESIGN CULTURE (OF) LIFE

---

---

1177 Adopt a costumer - to design new processes and packagings  
Maria Benedetta Spadolini, Chiara Olivastri

---

1190 Autonomy as a Design Principle: Service Design for the Technology Literacy of Older Adults  
Houjiang Liu, Miso Kim, Canqun He, Tia Thomson

---

1208 Bio-revolutions: radical change, design cultures and non-humans  
Carolina Ramirez-Figueroa, Luis Hernan

---

# CONTENTS

- 
- 1222 Cognitive Ergonomics  
Components for Analysis of User  
Interface in Healthcare Industry  
Mariia Zolotova, Angela  
Giambattista
- 
- 1238 Connect art and science for a  
functional biomimicry in design  
Andrea Forges Davanzati
- 
- 1244 Development of a test setup for  
validating a cognitive assessment  
platform within ICU's  
Muriel De Boeck, Philippe Jorens,  
Guido De Bruyne, Kristof Vaes
- 
- 1256 Food design as a tool for social  
development: experimental study  
in the evaluation of child smell  
Lígia Afreixo, Francisco  
Providência, Sílvia Rocha
- 
- 1272 FUTUR.DRESS. The Superskin for  
the Human Body in nearspace  
Maria Antonietta Sbordone, Ilaria  
Giampetraglia, Alessandra De  
Luca
- 
- 1286 Hybrid systems of human |  
technological | biological  
products: a road to a greater  
sustainability?  
Marco Marseglia, Francesco  
Cantini, Alessio Tanzini
- 
- 1301 No more whining – natural smart  
textile  
Nuutinen Ana, Pietarine Heidi,  
Kunnas Susan , Korpinen Risto,  
Sipola Reeta
- 
- 1308 Paving the way to post-digital  
smart materials. Experiments on  
human perceptions of a bio-  
inspired cellulosebased  
responsive interface  
Stefano Parisi, Markus Holzbach,  
Valentina Rognoli
- 
- 1325 The flow of emotions in co-  
creation  
Mariluz Soto, Caoimhe Isha  
Beaulé, Satu Anneli Miettinen
- 
- 1337 The Food Futures Teaching  
Cluster. Food Culture, Visual  
Communication Design, and  
Collaboration  
Peter K. Chan, Ben McCorkle, Rick  
Livingston
- 
- 1351 The river and the revered: Tracing  
the impermanence of the land,  
the people and the embroidered  
Indrajit De, Saumya Pande
- 
- 1364 The Shape of Drugs: a matter of  
Human-Centred Design  
Antonella Valeria Penati, Silvia  
Luisa Pizzocaro, Carlo Emilio  
Standoli, Valeria Maria Iannilli
-

# CONTENTS

- 
- 1377 The Wicked Home: Living Space as Ecological Holobiont  
Rachel Armstrong, Rolf Hughes, Nel Janssens
- 
- 1392 Three Dimensional technologies: Digitising Nature  
Gregor MacGregor
- 
- 1405 Towards Neurodesign. The Mental Effort in packaging design  
Alessio Paoletti, Lorenzo Imbesi, Angela Giambattista
- 
- 1413 “WIT” as a Sustainable Engine Overcoming Mind Fixation in Ideation  
Alon Weiss
- 
- 1425 **DESIGN CULTURE (OF) MAKING**
- 
- 1427 A designed generation: Maker's maturity and social responsibility  
Luca D'Elia
- 
- 1438 Accumulation of empirical investigation into joint structures in wooden furniture design  
Yi Shiang Lin, Ming Huang Lin, Jen Kuan Yau
- 
- 1453 Amorphous Stacks: A Low-Tech Construction Method for Jointless Cast Structures  
Liqiong Huo, Jongwan Kwon
- 
- 1468 An Exploratory Study about Communicating 4D Printing between Product Designers and Manufacturing Engineers  
Faten Ezrin Azhar, Eujin Pei
- 
- 1482 Biotextiles applied to everyday objects  
Viviana Quiña, José Francisco Alvarez Barreto, Cristina Muñoz Hidalgo
- 
- 1504 Claudio Alcorso and Post-war Textile Culture  
Tracey Sernack-Chee Quee
- 
- 1521 Collaborative Capabilities: aural encounters in digital/analogue co-creative making  
George S. Jaramillo, Lynne J. Hocking-Mennie
- 
- 1535 Collaborative ontology design for Open Hardware and Open Design  
Massimo Menichinelli, Emilio Velis, Andre Rocha, Alessandra Schmidt
- 
- 1551 Contemporary Spaces of Apparel Design: Embracing both Digital and Physical Environments  
Krissi Riewe
-

# CONTENTS

- 
- 1562 Design Cultures of Making: Fashion thinking as creative process and pedagogy  
Susan Postlethwaite
- 
- 1573 Design culture of playing. The musical instrument industry: an important culture of made in Italy.  
Marco Mancini
- 
- 1588 Digital encounters in the culture of textile making: developing a hybrid craftsmanship for textile design by fusing additive methods of surface fabrication with knitting technology  
Delia Dumitrescu
- 
- 1600 Distributed design and production for distributed care. Investigation on materializing bottom-up open and indie innovation in the field of healthcare  
Patrizia Bolzan, Massimo Bianchini, Laura Cipriani, Stefano Maffei
- 
- 1614 Heterotopia of Space: How capitalism is alienating and controlling societies  
Sarah Khayat
- 
- 1625 I - D (I – Design \_ Idiosyncratic Meta Design) Idiosyncratic Proceedings on Reading and Production Meta-Objects in Contemporary Industrial Design  
Mantikou Angeliki-Sofia, Farangas Athanasios, Zafeiropoulos Theodoros, Psychoulis Alexandros
- 
- 1640 If we can't make it together, we won't make it alone. The challenge and potential of collective making  
Lena Håkansson, Stephanie Carleklev, Stephan Hruza, Anna-Karin Arvidsson
- 
- 1652 Inter-Weaving Culture and Crafts in Design Education  
Puja Anand, Alok Bhasin, Priyanka Khattar
- 
- 1668 Learning through codesign toolkits. A case study on codesigning the cinema of the future  
Simone Taffe, Sonja Pedell
- 
- 1681 Letterpress: A Survey of Print Culture or an Immersive Learning Experience  
Alexander Cooper, Rose Gridneff, Andrew Haslam
- 
- 1695 Made by (Material) Frustration  
Arielle Blonder, Shira Shoval, Eran Sharon
-

# CONTENTS

- 
- 1711 Material culture(s). Research paths in an evolving material design culture, and the connected future designer's attitudes  
Doriana Dal Palù, Beatrice Lerma, Claudia De Giorgi
- 
- 1724 Mind-mapping in design culture: A tool for ideation in graphic design education?  
Philip Jones, Marion Morrison
- 
- 1738 New scenarios for developing cooperative platforms for local manufacturing  
Alberto Calleo, Giorgio Dall'Osso, Laura Succini, Michele Zannoni
- 
- 1752 Playing for change: designing a board game for the circular economy  
Thomas David Cockeram, Jessica Clare Robins, Emmanuel Tseklevs, Leon Cruickshank
- 
- 1769 Progetto Glume: from milling waste to resource for new materials  
Danilo Perozzi, Laura Dominici, Elena Comino
- 
- 1785 Re-distributed manufacturing in makerspaces. Towards a model of sustainable production  
Louis Rose
- 
- 1799 Research on the Application of Lacquer Craft in Modern Accessories  
Tianxiao Xie
- 
- 1811 The Emerging Fashion-Tech Paradigm in the Contemporary European Landscape  
Chiara Di Lodovico, Chiara Colombi
- 
- 1825 The evolving role of prototypes in design research: a discussion on terms and meanings  
Silvia D. Ferraris, Gabriele Barzilai
- 
- 1840 The Making of a Dress: Explicating the Implicit Processes  
Adrian Huang
- 
- 1857 The shape of wellbeing: investigating an approach for the development of a design requirements framework for design for wellbeing projects  
Sandra Dittenberger
- 
- 1873 Weaving sequential changes – designing textiles with multiple embedded stages  
Riikka Talman
-

## 1891 **DESIGN CULTURE (OF) MULTIPLICITY**

---

1893 Architectural Design Education as an Agent of Change: The Case of the Ultra-Orthodox Branch, Jerusalem  
Elissa Rosenberg

---

1904 “But I’m a lecturer not a therapist”: Educational Coaching – a proposed alternative approach to supporting students through their creative education  
Gary Pritchard

---

1918 Decoding the birth of transcultural fashion  
Shipra Kukreja

---

1934 Design as a medium for an informal learning. INDICOLearning from the interface to the activity  
Marina Puyuelo, Mónica Val, Hugo Barros da Rochas

---

1946 De-stereotype UX Design – Discussing and managing issues related to the clustering of users in the design of innovative solutions  
Margherita Pillan, Alessandra Mazzola

---

---

1958 Framing diversity: designing hearing aids from a deaf culture perspective  
Patrizia Marti

---

1979 Gazes and Gatekeeping: Reconceptualising the entrance portfolio in the post-colony  
Diane Steyn

---

1994 Hybridity as a culture of making  
Maya Ober, Nicole Schneider

---

2011 Hyper-Contextual Futures in Mexico City  
Paolo Cardini, Karla Paniagua

---

2025 Learning and Differences reciprocally shared and validated: A decade long Participatory Design collaboration between KG Elementary School and AD University  
Raymond Patrick Zachary Camozzi, Helene Day Fraser, Caylee Raber

---

2040 On (un)becoming in Design Academia: A Coloured female’s autoethnography  
Cheri Hugo

---

2058 The Ethics of Knowing a Shared Language and Intention in Design  
Lisa Elzey Mercer, Terresa Moses

---

# CONTENTS

- 
- 2066 The Neighbourhood Home. System of environments for plural inclusion  
Ilaria Longo, Sonia Massari, Alessandro Spalletta
- 
- 2081 Universal Visual Languages in a Male-oriented Society  
Valeria Bucchetti, Francesca Casnati
- 
- 2095 **DESIGN CULTURE (OF) NEW NORMAL**
- 
- 2097 A Comparative Study of Online Teaching Modes of Sino-Italian School of Design: A Politecnico di Milano, Tsinghua University, and Tongji University perspective  
Fan Chen, Lin Li
- 
- 2107 A COVID-19 Horizon Scan Looking for Post-Pandemic Implications for Design  
Marcus Foth, Glenda Amayo Caldwell, Joel Fredericks
- 
- 2126 A new way of perceiving the locality: economic growth, social inclusion, environmental protection  
Fabio Mongelli
- 
- 2141 A Sustainable Jewellery Design Practice for Psychological Health after Covid-19  
Huiyi Qu
- 
- 2153 Autopoietic design; seven components for a sustainable future design model  
Gonzalo Raineri Bernain
- 
- 2165 Community-led design capabilities during the COVID-19 pandemic and beyond  
Mariana Fonseca Braga, Eduardo Romeiro Filho, Haddon G. Guimarães Pereira, Emmanuel Tsekleves, Rosângela Míriam L. O. Mendonça
- 
- 2182 Cross-Team Brainstorming and a Comparison of Online to Physical Version  
Heng-Yi Mie, Hsi-Jen Chen
- 
- 2198 Design Education in a Pandemic Context  
Harald Skulberg
- 
- 2210 Design for Sustainable Healthcare. Cutting the impact of medical products through disposable packaging  
Gabriele Maria Cito, Angela Giambattista
-

# CONTENTS

- 
- 2227 Designing new learning experiences in pandemic time: how digital can support a new didactic in Service Design  
Andrea Taverna
- 
- 2239 Ecosystem Framework for Community Life Circles based on Life Projects in the Post-COVID-19 Era  
Tao Chen, Yong-Ki Lee, Juyoung Chang
- 
- 2253 Expansive Video Capture – Up close, personal & specific tutoring “performances”  
Brendon Clark
- 
- 2265 Gamified e-Learning approached through Emotional Design in the Post-Covid-19 era  
Na Wei, Yong-Ki Lee, Juyoung Chang
- 
- 2275 Healthcare innovation during the pandemic time: digital technologies to enhance clinic 4.0  
Stefania Palmieri, Mario Bisson, Alessandro Ianniello
- 
- 2289 Hospitals’ decision-making regarding infrastructural adaptations in response to Covid-19  
Pleuntje Jellema, Margo Annemans, Ann Heylighen
- 
- 2302 Identifying Factors for Designing a Successful Telemedical Training System for Remote Pediatric Physical Exams  
Elham Morshedzadeh, Ph.D., Andre Muelenaer, MD, Jr, MD, MS,, Michelle Morris, Dana Werlich, Margaret Nelson, MD.
- 
- 2316 Inter-University Design Workshop: plurality in design education  
Inés Alvarez-Icaza Longoria, Diego Alatorre Guzmán, René Harari Masri, Lucero Donaji De la Huerta Santaella, Ana Elena Hernández Palomino
- 
- 2332 Kids-centered Pocket Park design. Well-being for children in the urban post-covid context.  
Benedetta Terenzi, Anna Laura Pisello
-

# CONTENTS

- 
- 2720 Creating an inclusive learning environment to support transformative learning and encourage upward educational mobility opportunities for economically or academically under-resourced design students  
Michal Rotberg
- 
- 2736 Cultural Differences as Challenges and Design Drivers in the Development of Smart Assistive Technology for an Ageing Society  
Danying Yang, Louise Moody
- 
- 2752 Data visualization and knowledge sharing in participatory design to improve people liveability in urban places  
Giovanni Borga, Massimiliano Condotta, Chiara Scanagatta
- 
- 2768 Democratizing design: lessons from a case study in the Alpine area  
Daniele Busciantella Ricci, Ilaria Argenziano, Marta Gandolfi, Michela Ventin
- 
- 2786 Design for Promoting Pro-environmental Behaviours of the Georgian Domestic Workers in Ankara  
Ayşe Kaplan, Lilyana Yazirlioğlu
- 
- 2800 Design projects as drivers for organisational change in the public sector  
Felicita Smittinger Schmittinger, Alessandro Deserti, Francesca Rizzo
- 
- 2813 Design when you are the other 90%, a student's perspective  
Kyle Graham Brand
- 
- 2826 Design with Social Justice in Mind. The Case Study of Furniture Design in Elementary Schools  
Caroline Gagnon, Claudie Rousseau, Thomas Coulombe-Morency, Sonia Cadoret, Colin Côté
- 
- 2846 Evolving future city-based retailing via design thinking: A Chinese hybrid model approach  
Yujia Huang, David Hands, Rachel Cooper, Nick Dunn
- 
- 2862 Feeling Endem. How travel enhances applied-autonomy in spatial design  
Hans Venhuizen
- 
- 2878 Global Proximity: case studies of international and interdisciplinary collaboration between the USA, Italy, Guyana and Japan  
Valeria Albani, Paolo Cardini

# CONTENTS

- 
- 3212 Circle Sector: exploring the role of designers in a circular economy  
Ben Hagenaars, Niels Hendriks
- 
- 3222 Cooperatives enterprise, incubators for the co-design of a new organizational and management model for sustainable development.  
Caterina Rosini, Silvia Barbero
- 
- 3235 Craft Your Future: Building a circular space through the European digital craft  
Chele Esteve Sendra, Manuel Martínez Torán, Eileen Blackmore, Hendrik Jan Hoekstra
- 
- 3249 Creativity as a Driver in Social Innovation Processes  
Debora Giorgi, Irene Fiesoli
- 
- 3264 Design culture (of) resilience. Space & Service design taxonomy, overcoming undefined space & service design contexts  
Nansi Van Geetsom, Andrea Wilkinson
- 
- 3282 Design education and forest environments – learning from and with living systems  
Caroline McCaw
- 
- 3297 Design educators in the 21st century: Applying The Compass methodology to prepare future designers as changemakers in a culture of resilience  
Catalina Cortés, Alejandra Amenábar
- 
- 3311 Design for Social Impact and Crafts Communities in Turkey  
Hazal Gumus Ciftci, Stuart Walker
- 
- 3324 Design Plugin: Using Design Thinking Approach in Smart Sustainable Cities Education  
Tarmo Jaakko Karhu, Martijn Gerhard Rietbergen
- 
- 3337 Design projects as drivers for organisational change in the public sector  
Felicitas Schmittinger, Alessandro Deserti, Francesca Rizzo
- 
- 3350 Designing community: creating resilience through collaboration  
Jessica Clare Robins, Emmanuel Tseklevs, Leon Cruickshank
- 
- 3365 Designing resilience. Design dealing with communities  
Carlo Branzaglia
- 
- 3371 Designing Resilience. Mapping Singapore's Sustainable Fashion Movements  
Harah Chon, Lim Jiayi Natasha, Elisa Lim
-

# CONTENTS

- 
- 3382 Designing Sustainable Product-Service Systems applied to Distributed Economies in Water-Energy-Food Nexus approach  
Renke He, Meng Gao, Carlo Vezzoli, Ke Ma
- 
- 3401 Discovering Design Values in the Chinese Pre-Qin Classics  
Miaosen Gong
- 
- 3412 Eco-lab-orating. Insights from an ongoing intervention with design school faculty  
Rakefet Kenaan
- 
- 3424 Educating Designers for the Circular Economy: Innovative Digital Resources, Collaborative Learning and Synergic Actions  
Lucinda Morrissey, Roberta Barban Franceschi, Ana Margarida Ferreira
- 
- 3436 Evolving the conventional curriculum: innovative learning interventions in a classroom to enhance design students' learning competencies  
Joselyn Sim, Harah Chon
- 
- 3448 Fashion Futuring. Rethinking sustainable fashion design  
Alessandra Vaccari, Ilaria Vanni
- 
- 3458 FASHIONABLE FAÇADE: textile waste innovations for the built environment  
Hilde Heim
- 
- 3476 Food Cycles. Redesigning processes and products  
Silvia Pericu
- 
- 3487 From Objects and Products to Things and Stuff  
Clare Green
- 
- 3501 Green infrastructures and satellite images: the case study of Munich  
Giovanni Borga, Filippo Iodice, Federica D'Acunto
- 
- 3516 I Don't Want to Feel Outdated. The dissonance between product attachment and contemporary relevance  
Malene Pilgaard Harsaae
- 
- 3527 Innovation through circular economy: Tool development for multidisciplinary approach to product-service-system Design  
João Sampaio, Ana Afonso
- 
- 3544 Lost in transition; Methodologies and tools of Product-Service Systems Design for major life transition  
Maria Paola Trapani, Nadejda Cervinscaia, Nadejda Cervinscaia
- 
- 3560 Materials Designers. Boosting Talent towards Circular Economies  
Laura Clèries, Valentina Rognoli, Pere Llorach-Massana
-

# CONTENTS

- 
- 3572 Preparedness and infrastructure design for disaster and emergency situations; the key to a resilient community  
Noemi Bitterman, Medardo Chiapponi, Alessia Buffagni, Andrea Cotti
- 
- 3585 Replicating the Unpredictable: Board Games as Prototypes for Wildfire Evacuations  
Thomas Maiorana
- 
- 3597 Revised Function Analysis of Sustainability - understanding the complexity of sustainability  
Paul Topf Aguiar de Medeiros, Charlotte Sjödel
- 
- 3616 Role of Social Ecologies within Social Design and Social Innovation  
Neeta Verma
- 
- 3626 Slow Engagement & Widening the Frame – Emerging Models of Social Innovation and Design Culture  
Diana Nicholas
- 
- 3641 Smart, Safe and Green System. A Resilient-Based Strategy for Sustainable Buildings and DIY Design  
Cecilia Cecchini, Miriam Mariani, Paolo Mondini
- 
- 3655 Strengthen Ties of Social Bonding Through Design from and Emotional Perspective  
Deyanira Bedolla Pereda
- 
- 3672 Study on the Sustainable Design of the Young Elderly Oriented Smart Wearable Products  
Chen Han, Shen Lei
- 
- 3686 Surviving in the wild: Sustaining design and social innovation initiatives in Asia-Pacific  
Cyril Tjahja
- 
- 3699 Sustainable Deliberation; an Empathetic ‘Mantra’  
Amita Deshpande, Ranjana Dani
- 
- 3715 Teaching and Practicing Service Design and Social Innovation: Experiences with Communities at the Margins in São Paulo, Brazil  
Rosana Vasques, Mari Suoheimo, Maria Cecilia Loschiavo dos Santos
- 
- 3727 The cot, the pot and other stories  
Lena Gupta
- 
- 3755 The Materiality of Resilience  
Emile De Visscher, Lorenzo Guiducci, Iva Rešetar
-

# CONTENTS

---

3774 The poetics of waste in contexts of satisfactory use and social action

Desamparados Pardo Cuenca,  
Patrik Baldan

---

3795 The potential of Theory of Change to visually model the underlying logic behind service design projects

Luca Simeone, David Drabble,  
Kerstin Junge, Nicola Morelli

---

3810 The SDGs framework as strategic lever for design education.

Simona Maccagnani, Marco Ricchetti

---

3823 The Tree and The Room: Co-Designing DIY WiFi Networks with Emergent Local Metaphors

Michael Smyth, Ingi Helgason,  
Lauren Lapidge, Katalin Hausel

---

3838 Towards 'regenerative interior design': exploring a student project

Giovanna Di Monte-Milner

---

3853 Trace: design and responsibility in the Prato textile district

Elisabetta Cianfanelli, Renato Stasi, Matilde De Gennaro, Maria Grazia Soreca, Margherita Tufarelli

---

---

3863 Walk the talk: Towards an ecological futures framework for our designed cultures

Håkan Edeholt, Jomy Joseph, Nan Xia

---

3878 Water infrastructure as leverage for resilient cities: a multi-scalar design perspective on urban flooding

Sophie Leemans, Erik Van Daele

---

3894 Weaving the New Way of Making from the Andes

Rodrigo Muñoz-Valencia

---

3912 Working with the United Nations Sustainable Development Goals in Design Education

Silje Alberthe Kamille Friis

---

---

## 3929 **DESIGN CULTURE (OF) REVOLUTION**

---

3931 Alternative narratives data visualization archive

María de los Ángeles Briones Rojas, Michele Mauri

---

3945 Becoming Lost and Found in Translation

Mark Ingham

---

# CONTENTS

- 
- 3963 Critical Thinking in fashion design education - New learning approaches for a systemic change in the fashion industry  
Carolin Ermer, Julia Schwarzkopf
- 
- 3980 Design as a methodological stance in interdisciplinary research  
Valérie Côté, Caroline Gagnon, Lynda Bélanger, Daphney St-Germain
- 
- 3996 Design for Fast Track Democracy  
Jennifer Schubert, Bastian Koch
- 
- 4009 Disrupting governance by Systemic Design and co-creating the public value  
Carolina Giraldo Nohra, Eliana Ferrulli, Silvia Barbero
- 
- 4025 Disruptive technologies and behavioural change: Design fiction as trigger for critical thinking  
Mila Stepanovic, Venere Ferraro
- 
- 4043 Does design thinking matter? Empirical study and survey on the effectiveness of design thinking  
Hannah Park
- 
- 4057 Education formats to integrate Design with Humanities, Politics, Social Sciences & Education  
Anna Lottersberger
- 
- 4071 Experiments on complex systems mapping around materials.  
Flavia Papile, Romina Santi, Beatrice Gobbo, Tommaso Elli, Barbara Del Curto
- 
- 4088 Exploring visualizations of design processes from a design activist perspective – a scoping study  
Karina Goransson, Anna-Sara Fagerholm
- 
- 4105 Fashion-Tech Revolution: Future Frontiers from Products to Processes  
Alba Cappellieri, Chiara Colombi, Livia Tenuta, Susanna Testa
- 
- 4123 From the product to the object. The speculative design practice as instance.  
Chiara Scarpitti
- 
- 4135 From trustful empowerment to overwhelming guilt: pedagogy in current activism practices  
Alexia Autissier
- 
- 4147 Guilty Materiality: why we play down material relations  
Stéphane Treilhou, Clare Green
- 
- 4160 MANIFESTO! Now: Game Design for Revolutionary Thinking  
Julian Hanna, Simone Ashby, Sónia Matos, Alexis Faria, Callum Nash
-

# CONTENTS

- 
- 4174 Ph.D. Admission System Based Comparative Study in Design Discipline under Chinese Context  
Fan Chen, Jing-Yi Yang
- 
- 4187 Politics by design  
Elisabetta Cianfanelli, Maria Claudia Coppola, Margherita Tufarelli
- 
- 4200 Projecting Change: Redefining Preservation in the Era of Sea Level Rise  
Liliane Wong
- 
- 4218 Realising Discourse: A Strategic Design Solution to the Problem of Addiction  
Jason Hobbs
- 
- 4239 Reframing development: A proposal on the role of design research in Latin America based on situated views of the world  
Juan Alfonso de la Rosa
- 
- 4250 Speculative Design for the Public Sector. Design Fiction as a Tool for Better Understanding Public Services  
Gianni Sinni
- 
- 4263 Speculative Design in Education: Mapping the Landscape  
Ingi Helgason, Ivica Mitrović, Julian Hanna, James Auger, Enrique Encinas, Michael Smyth
- 
- 4275 Targeting Design Intervention across Levels of Complexity  
Tanner Slade, Nicola Morelli
- 
- 4288 The Agency of Discursive Design Exists in the Industrial  
Karma Dabaghi
- 
- 4303 The Patient Revolution. New design perspectives in healthcare innovative processes.  
Carla Sedini, Laura Cipriani, Massimo Bianchini, Barbara Parini, Stefano Maffei
- 
- 4319 The transformation will not be televised  
Peter Friedrich Stephan, Raz Godelnik
- 
- 4333 Time and Design. Time as a key parameter for a survey on contemporary design  
Enza Migliore
- 
- 4351 Walking the Line: Creative Research as Critical Activity for Design  
Brooke Chornyak, Tania Allen
- 
- 4370 Why we need more somatic culture in design  
Silvia Sflijiotti

## 4768 POSTERS

---

4769 A visual-analytical approach to phases of transition in people's life paths

Laura Heym, Jennifer Schubert, Irene Visentini, Sofia Sanchez, Alvise Mattozzi

---

4770 Aeon, in his original meaning of "life", "vital force" or "being", "generation".

Ana Maria Fessmann, Elene Bakhdatze, Vaishnavi Bala, Varshini Janakiram, Janina Hietl, Gianfranco Olivotto

---

4771 Co-creating prosthetics as fashion accessories for assisting people with disability. The case of hearing impairment

Andree-Anne Blacutt, Stéphane Roche

---

4772 Collaborative methods: design bridging academia and industry

Teresa Franqueira, Pereira Catia

---

4773 Craft in Makerspaces: The Potential for Social Change for Sustainability

Alessandra Fasoli

---

---

4774 Creative design process for envisioning the future of emergency medical services in smart cities

Vipul Vinzuda, Niall Deloughry, Leonard O'Sullivan

---

4775 Design and Neuroscience for the UX. Possible tool for Designers

Alessio Paoletti

---

4776 Design as a tool for participatory transformation of urban space

Jacobo Muñoz Duato, Damià Jordà Bou

---

4777 Digital visual tool for design project development in a multidisciplinary team

Michela Carlomagno

---

4778 Education in social design by means of artistic photography

Cecilia Casas-Romero

---

4779 Enabling Collaborative Turns: A Conversation-Based Approach for Design Workgroups

Sze-Yunn Seah

---

4780 Experimenting new joints for more sustainable and easier to assemble furniture

Patrizio Cipollone, Viktor Malakuczi, Felice Ragazzo, Michele Russo

---

# Artificial Intelligence is a Character? Exploring design scenarios to build interface behaviours.

Andrea Di Salvo\*<sup>a</sup>, Andrea Arcoraci<sup>b</sup>

<sup>a,b</sup>DAD – Department of Architecture and Design, Polytechnic of Turin

\*andrea.disalvo@polito.it

**Abstract** | The paper aims to illustrate the qualitative results of the first phase of the scenario research about voice interfaces, examining whether it is possible to design them as if they were a theatrical or cinematographic character. The research field intersects interaction design with character design, intended as the narrative construction of a character, and theatrical performances. The experimentation takes advantage of theatre workshops that aims to show, and understand, which are the main characteristics of a vocal interface and how to design them according to a performance approach. The paper ends illustrating how design can address actual opportunities and criticalities about emerging technologies, following a relations-based approach.

**KEYWORDS | INTERACTION DESIGN, VOICE USER INTERFACES, CHARACTER DESIGN, SCENARIO, THEATRE WORKSHOP**

## 1. Introduction, from voice to personality

In recent years, there has been a widespread diffusion of devices that integrate vocal interfaces closely connected to artificial intelligence. Although these issues were already debated in the scientific community during the early 1990s, only in the last decade this topic experienced greater insight from many disciplines, including interaction design. The renewed attention is linked to the massive diffusion in the daily life of two products-functions: voice assistants (SIRI, Google Assistant, Alexa, Cortana); smart speakers (Amazon Echo, Google Home) that had a surge in sales. The scenario also includes extremely complex products, such as robots, voice assistants on board of cars with different degrees of automation and web pages applications. Therefore, the research field appears to be very broad and even in the scientific literature names of the vocal interfaces are connoted with different nuances. They are defined as Vocal Agent (VA), more often as Vocal Assistant, Conversational Agent (CA), Intelligent Assistant (IA), Virtual Assistant (VA). Robotic scientists, for example, imagined them to help fill the gaps in human social relations to generate friends and companions (Richardson, 2015). If the set that contains all the definitions is called Natural User Interfaces (Dasgupta, 2018), much is being discussed not only on the functions of the interfaces but, above all, on aspects such as: the emotions they should communicate, the characteristic traits of the personality, the ability to stimulate virtuous behaviours. The concept of naturalness is still debated in the scientific community, but the dialogue makes interaction easier because voice interfaces currently allow a great tolerance in the understanding of the input messages, without forcing the user to be strict encode and learn standard messages to be given in a dialogic fashion (Dale, 2016). Moreover, the voice is not only perceived as human-like, but human traits are also associated with the behaviours of the system (Nass, Steuer & Tauber 1994). People tend to infer more a human creator behind the computer, hearing a voice than reading the same text (Schroeder & Epley, 2016). Even if users are perfectly aware of the presence of an artificial intelligence, they believe that voice-human has real needs and desires (Short, 2017), human emotions or traits (Brave & Nass, 2007), feeling even more comfortable when VA asked invasive questions (Yu, Nguyen, Prakkamakul & Salehi, 2019). People create a mental image of the voice, including personal traits, attitudes, background information and even physical characteristics (Cohen, Giangola & Balogh, 2004). Starting from this statement, VAs are usually designed to include emotion appraisal (Castellano et al., 2013), generation and expression capabilities (Tsiuorti et al., 2016), to produce empathy (Lunardo & Bressolles, 2016). Other attributes usually associated with VA are: empathetic (Fung et al., 2016), affective (Oker et al., 2015), emotive (Maldonado & Nass, 2007). All these efforts are made to foster communicative and emotional aspects, but the core concept follows the design of a human-like interface, defining it as emotional intelligence, that is grounded in parameters like: believability (Ranjartabar & Richards, 2016), the illusion of life (Bates, 1994), collaboration (Cassell, Sullivan, Churchill & Prevost, 2000), trust (Cheepen, 1988), sensitivity (Dibitonto, Leszczynska, Tazzi & Medaglia, 2018), capable of conversing (Clark et al., 2019). However, one of the most debated topics is how to give to VA a recognisable personality to simulate a

real human-like dialogue; many scholars apply the same personality model both to the human and the machine side, because the base construct is to create a match between human personality and the machine one. But, at present, the VA wide spreading generated an unusual loop in which scholars are still analysing commercial VUI to find if there is a clearly designed personality, which categories of user can easily accept, adopt and engage a stable relation with that kind of VUI. While personality is well described by Corr and Matthews (2009) as "the set of habitual behaviours, cognitive and emotional patterns that evolve from biological and environmental factors", then the first split concerns the subdivision between the personality traits theory and the personality types one. Personality trait theory considers characteristics of people as part of a larger continuum and its approach is described into the Big Five theory; personality types theory, instead, describes characteristics of people as discrete categories. Big Five theory (McCrae & John, 1992) specifies the general affective behaviour by the five following traits: Openness, Conscientiousness, Extraversion, Agreeableness, Neuroticism. Type theory has its roots in personality scales, such as the Myers-Briggs Type Indicator (1962), which posits 16 personality types deriving from a set of four fundamental dichotomies, for example, extroversion vs introversion. It is worth noting that in the analysed studies, scholars do not use the two approaches as separate, but often mix them by adding other parameters, see for example Heudin (2017), such as mood (Morris, 2012) and emotion (Campos et al., 1994).

## 2. Analysing and designing personalities of VA

The literature review presented in these first two sections aims to show how interaction design considered the aspects of voice interfaces design, especially the humanization aspects, including users' inferences. The analysis includes design and psychology references as the research field is multidisciplinary, but broadens the field also considering character design. Garcia, Lopez, and Donis (2018) analysed 3661 online surveys to assess the VA personality; their goal was to evaluate VA and identify people desired VA personality. They found that: attributes most frequently associated with VAs were practical, informed, up-to-date, well-mannered, logical and helpful; the least associated were cheerful, sweet, sentimental and masculine. On the other hand, Ehrenbrink, Osman, and Möller (2017) found the personality profile of testers and their preference for Siri, Google's Now and Cortana, based on attractiveness and psychological state reactance. The results show how the group of testers who preferred Siri was the largest and matched the average personality profile. The Google Now group was preferred by extravert, the group that preferred Cortana was more neurotic, less agreeable and less extroverted. Doyle, Edwards, Dumbleton, Clark, and Cowan (2019) present a study in which two VAs are compared with human interaction. They found eight key dimensions to categorise participants' perceptions, for this study is essential to quote at least three of them: conversational interactivity, partner identity & role, vocal qualities. MA, Yang and Fung (2019) used the Big Five model to understand whether VAs personality affects how people perceive intelligence of VAs; their testers observed VAs

endowed with personalities more intelligent than the robotic one. There are still a few examples of how to design the personality of a VA. Spencer, Poggi and Gheerawo (2018) designed, through participatory design workshops, four personalities based on Jung (1954), Person and Mark (2001) archetypes. They define four main features: purpose and story, person, tone of voice, language. Lee, Lee and Lee (2017) show the results of workshops with groups of two users that play the human role and the VA role, using the Wizard of Oz approach. They found that if the VA role was acted in a cheerful and friend like users were funnier and more satisfied, even if the time to complete the tasks were longer. On the other hand, groups with introvert played VA had the best performance with a minimum level of communication. Ghosh and Pherwani (2015) observed the behaviour of assistants in real life. They collected data about communication styles, attitudes, language and nonverbal cues, strategies to face the boss mood. Then they selected nine personality attributes to generate three hypothetical personalities. This work is significant, but, according to the authors, is focused on the assumption that a VA could be only an assistant and must act mimicking those behaviours. Heudin (2015) designed an emotional metabolism that can manage personalities, moods and emotions into a multi-personality conversational agent. He experimented 12 personalities, some of them referring to characters of cinema. He claims and demonstrates that multi-personality agents work better than mono-dimensional ones preserving coherence. Finally, Braun, Mainz, Chadowitz, Pflöging and Alt (2019) propose to match the personalities of users and VA using Big Five models and experiment them into a real-world driving study. They designed four assistant personalities (friend, admirer, aunt, and butler) and their results show "higher likability and trust for assistants that correctly match the user's personality while we observed lower likability, trust, satisfaction, and usefulness for incorrectly matched personalities". The interesting part of this work is the use of a voice pre-recorded by an actress. In the literature review, the authors found some work about the characterization of the interfaces, starting, for example, from the work of gender analysis by Schnobelen (2016); Luria (2018) suggests three guidelines to design personal robots: reciprocity, affirmation and independence. These come from a review of 15 sidekick characters from popular books and movies. Literature analysis shows that there is still a little corpus of studies about the designing of the personality of interfaces in general. The authors also found that is not clear how to design the behaviours of a voice according to the users and the context, finally even if it is true that people consider VA as human-like there is still a design space to project an AI character giving to machines their characterization. According to these brand-new studies and previous experimentations, the authors want to explore the characterization of the interface and the concept of performing interfaces which is recently be claimed by Aylett, Cowan and Clark (2019), underling the differences between personality and characters. Therefore, considering personality aspects is now part of the design process but as VAs are considered human-like can they be considered as characters? Which elements besides personality are needed to design VA in this way?

### 3. Methodology and Workshop structure

The experimentation makes use of designed theatre workshops that aimed of showing and understanding the main features of a vocal interface and creating a grounded common language background between performers and designers. The workshops involved three professional actors, they currently work for theatre shows and film productions, they also recorded voice over for films. The elements of discrimination to choose them were: their experience in shows where the contact with the audience was much closer, for example in contexts without a stage and barriers between actor and audience; their work as teachers. We assumed that the closeness and direct interaction with the audience, greatly influences the character and generates sudden changes during the performance, then teachers of acting methods have experience in explaining all the facets of the theme. The three workshops with the individual actors lasted about three hours each, they took place at the authors' department, both the authors took written notes during the workshop. We chose not to record audio and video, except for brief moments related to performance examples, in order to avoid that the actors could perceive the workshop as a set. The first phase focused on the voice assistants currently available on the market; the goal was to: verify the actors' knowledge of the interfaces; acquire familiarization with them; investigate their use; test the other devices they were not aware of; collect their perceptions on the voice assistants asking them which were the main perceived parameters and if they found the features of a character designed as such. The second phase concerned a critical analysis, in which the actors were asked to comment on three vocal interfaces chosen among the many present in the cinema (Samantha in *Her*, HAI9000 in *2001: A Space Odyssey*, the episode *White Christmas* taken from the *Black Mirror* Series). The aim was a deeper understanding of how a cinematographic interpretation of an AI was designed and realized and to trigger a dialogue on character building. The third phase mixed elements typical of the semi-structured interview and the performance. The actors were asked to explain not only the main factors that allow to characterize a character during the performance, but also the developing method itself across different steps. This framework could also be useful not only in the preliminary phase, as in this paper, but it could be also used for concept generation and validation. In fact, the general goal is to better understand how performing a character is different from considering personality as seen in literature, in order to obtain other parameters to integrate into the design process.

### 4. Results

During the first phase all the actors confirmed that they know at least one of the vocal assistants, but they do not own them as speakers. One uses Siri on iPhone weekly, one Google Assistant daily, one Google Assistant only in particular situations (i.e. driving). The actor using Siri started to do it after a random event. During the rehearsals, Siri started talking without anyone wanting to do it. From that moment, Siri was used as a character on

stage as a disturbing and surreal element. All actors previously seen Alexa at work, none of them ever interacted or listened to Cortana's voice. In order to demonstrate how the four VAs work, the actors could freely talk to the assistants for few minutes. Then actors asked to the VAs to tell a fairy tale and sing a song. This choice allowed the actors to listen to two possible uses of the voice closer to their context. For all four cases the actors were asked to evaluate the vocal assistants according to the criteria of verisimilitude, and the parameters associated with the voice that were more evident to them. The comparison with the parameters is based on the literature and includes tone, timbre, pitch, rhythm, intonation, accent, prosodic elements. The three actors recognized as plausible Siri and Alexa, praising the quality of Alexa's voice, while judging the sound quality of Google Assistant and Cortana as still "too raw" and "robotic old school". Judgements about the characteristics of the voice were: "always UP", "always ready and enthusiastic", "ringing". It should also be pointed out that one actor emphasized that all these characteristics reinforced negative stereotypes related to female gender. The three female voices were also defined as the mirror of current technology. According to the actors, it seems that the voice that represents the intelligence of the machines has that particular timbre. The reaction in front of the fairy tales and songs of all three actors was of "amazement", "makes you smile", "could be used as a pastime". Vocal assistants told: a text about punctuation (Google Assistant); the little mermaid (Alexa, NB with sounds and accompanying effects); the fox and the grape (Cortana); Siri avoided answering. By repeating the experiment, some of the VA can change behaviours, Cortana sometimes answers similarly to Siri and Google Assistant, telling their own story. The actors highlighted that this might contribute to the construction of VA back-story. The songs, instead, have been an element of debate, especially about Cortana (Italian anthem) and Alexa (Il canto dell'addio). The actors expected that VA would use a tone modulation effect, called vocoder, and that they could not keep up with the rhythm of the song. But voices and rhythm were not distorted, so actors assumed that a speaker recorded the songs ad hoc. Google Assistant's voice, instead, collides with the actors' expectations because it sings nonsense lyrics; while Siri refuse to sing and after some insistence provides a spoken version of the song "Nel blu dipinto di Blu". The songs provided more elements on the analysis of the parameters of the voices, i.e. the rhythm, the cadence and the tails of the vowels. The rhythm is perceived by the actors as "broken", "not fluid", especially when the period becomes very long. In their opinion this depends on a cadence that is not yet fully characterized, but above all on the vowels cut in the length at the end of the words. If, in fact, the addition of some pauses and hesitations, such as "ehm", recalled probable human behaviour, one actor pointed out that the word can be pronounced more or less quickly, but very rarely is cut off sharply. The question at the end of the first part concerned the perception of a designed character in VAs. In this case all the three disagreed, pointing out the total lack of acting and of typical aspects of the character, defining the interfaces as "generalist", "average", "not at all prone to make the interlocutor emotional", "distant, though always cheerful and available". When asked to compare their comments to the personality classifications found in literature, actors agreed on their utility, but they pointed out that personality is not "rock-hard", it has to be declined in every single line and actions;

so, it is not possible to apply personality just to a question-answer, but it needs more connotation as a whole character. They underlined that a character needs more psychological elements – personality is just one of them –, physiological and sociological features in a complex way. The second phase was dedicated to the analysis of three videos that clearly show the interactions with artificial intelligence. The beginning of this phase was dedicated to watching some part of films in English and Italian language. The first sentence that all the actors uttered was almost identical "this is acting", "we are talking about something else", "it is not comparable". The actors underlined the strong interpretation highlighting the unbridgeable difference between actor and speaker. Although some subjects of actor and speaker courses of study are similar, actors are called to work with their whole body "in a holistic way", while speakers can work only on aspects of voice. Explaining better those concepts, actors focused both on the vocal emission through the body and its movements, and on the psychological aspects. They performed some lines showing how that interpretation could be generated by focusing on the invisible body of the actor, for example "even if you can't see the body of Scarlett Johansson (Samantha's voice in the film Her), you can perceive her posture, her gestures, you can hear her breathing". Two of the actors narrate, in fact, that in order to emit sounds in the theatre it is necessary to involve the whole body, that is used according to postures, movements and gestures to limit, amplify or modify the sounds, even stage costumes are taken as a cue to characterize the vocal emission. In the theatre, the psychology of the character is explored in an extremely detailed way and the indications are often metaphorical, "that sound must be yellow". Sentences that seem to recall Kandinsky's theories and that, however, could generate a common background language starting from design elements. All the actors agreed on another determinant factor of the acting: it can return the change in the psychology of the character. "You can understand what Hal9000 is becoming paying attention to how the interpretation is changing, the rhythm, the sound, how it plays between the mellifluous and reassuring register and the attitude of the one who hold your life in its hands". The voice reacts to the narrative, to the evolution of the characters during the whole time. One actor, commenting on the scene of Black Mirror, dwells on the fact that it is the man who tries to imitate, to impersonate the role of the machine, as if the machine now had a predetermined archetype. The third phase focused on two questions: how an actor builds the character to be performed on stage and how, once on stage, he modulates and manages everything he has studied. The answers were very different, many methods and schools of acting were mentioned and often the answers remained on a high level, the same about the voice parameters. Three phases emerge: study and construction of the character by themselves, adaptation of the character during the rehearsals with the director and the other actors, live performance. During the first one the answers have common traits when quoting the questions towards the character. This is a technique widely used in writing (Seeger, 1990), whether it is dedicated to novels, films or theatre performances. It is an approach that can also be found in character design and concerns the exploration and research of the character, starting first with the written text analysis and then adding levels of depth on all possible aspects of the character's life and story. When a detail is not present in the text, the

actors reconstruct it. This serves to build the internal motivation, "the engine", the goal that will become increasingly evident on stage. The reconstructed elements will help the actor in shaping the character. On the basis of the text and the questions to the character, the actors declare to build "a scheme", "a grid" that includes all the elements, from the dominant emotions to the recursive gesture (e.g. of the hands) constructing a recognizable grammar of the body, from the parameters related to the voice to the relationship they will have with the other actors. The second example has been defined "the jazz grid" and is linked to the other two phases of rehearsal and live performance. The actor builds the character on a "reactive grid", with possible responses to other events. As in jazz improvisation, the interpretation becomes relational. The grid then responds to the input provided at that moment by the other actors, by the audience, by the context and by the environment whether real (in the street or in houses), or on stage. A clear distinction emerges between these two environments. Although the actors on stage claim to perceive very well how the audience is reacting, in situations without barriers the actor enters a direct relationship with the nearby audience and modulates the parameters of the grid by virtue of the audience's attitude. In these cases, they say that the range of variation of the parameters is much wider to better adapt, provoke, seek empathy with the audience.

## 5. Conclusions

The actors' vision was very much concerned with qualitative aspects of performance. Aspects not found in the literature and divergent ones appear in all three phases of the workshop, from the use of the whole body acting to generate the voice, to the need to build the psychological aspects of the character, starting from his relations and his story that evolves during the use. The lack of characterization of VA is highlighted, as a homologation on many aspects. Furthermore, some purely vocal aspects must be implemented, such as the final resonance of the vowels and a design of some distinctive features such as rhythm and cadence. It is difficult from the analysis of these workshops to draw precise variations in order to obtain immediate results applicable to the existing vocal interfaces. According to actors the project is missing, although the vocal instrument is at an advanced state of realization and their producers are exploring innovations such as emotional intelligence, which may not fill the aspects of emotional reaction. The three workshops, on the contrary, allowed the authors to glimpse what could be a road still little explored regarding the question: what is the character of technology, of artificial intelligence? Cinema and visual arts provided many answers designed to stimulate reflection, trigger discussion and provoke, but by now the technological tool is already present in our homes and in our habits. Personality aspects can be considered a starting point but, as actors pointed out, using only personality the risk is to obtain a homogenisation of the interfaces' behaviours. To create real emotional conversational VA, the next step should be the construction of a complex character able to react during the dialogue, according to the situation and the context. The contribution of design in this field can therefore be very methodological, if it integrates not

only actors for performance but also copywriters, psychologists and social science experts in a wider way.

## 6. Future Works

The presented work is part of a research project that will end with the design of an interface for a self-driven vehicle. The next step will therefore concern the definition of some possible characters that AI will be able to interpret in a well-defined context, the script writing and interpretation of the actors and the subsequent post-production actions that are still open questions.
