THE REAL ESTATE FUNDS FOR SOCIAL HOUSING: an insight into the Local Ethical Fund “FASP” in Piedmont

Arch. Luisa Ingaramo
arch. Stefania Sabatino

June 2011
MAIN QUESTIONS

What are at present the challenges to social housing providers?

How the fall out of the crisis is changing the financing environment and traditional financing institutions (i.e. public and private investors)?

What should financing vehicles be trying to accomplish?

Which social groups are suffering from housing stress?

The New Italian Housing Plan: a new coherent National framework

The Local Ethical Funds: a resourceful tool fitting the operators’ and households’ Expectations

The start up of the forthcoming Fund FASP in the local context of the Piedmont Region.
What are at present the challenges to social housing providers?

- Stability and Growth Pact, social inclusion, energy efficiency...
- From the “Bricks and mortar” public subsidies to the private investors commitment
- 3rd sector expertise & the cost effective philosophy”

How the fall out of the crisis is changing the financing environment and traditional financing institutions?

- Risk aversion of private investors (commercial players)
- Qualified investors avoiding free grants (Banking Foundations...)
- Restraints in public investments, grants, etc.. (Central Gov.)
- Hit the Real Estate Economy, didn't cut dwelling costs and housing discomfort
What should financing vehicles be trying to accomplish?

• **Both Public and Private potential investors are looking for:**
  - Resilient investments (low risk, reliability, cost effectiveness)
  - Trusting partnership
  - New Central Regulation and more co-ordination with local programs
  - Local co-operations (commercial players, major investors, public bodies)
  - The 3rd sector expertise involvement
  - Tax privileged treatment
Early fallout of actions led by means of the advisory activity (demand-supply analysis)

**Evolution of housing rents and sales (average data)**
Time series: 1996-2010 (at constant values)

---

In order to gather the sense of the FASP Fund and to address the right social housing interventions within the Piedmont Region, this paper offers an insight of the present housing stress in Piedmont (Northern Italy) and in its core city “Turin”, with a particular deepening into rent and income levels, as well as into some demographic variables, especially for particular social groups, emerged through the recent phenomenon of fragmentation of the family unit.
Early fallout of actions led by means of the advisory activity (demand-supply analysis)

A diffused emergency, particularly evident in the core Italian cities

The new Italian Housing Plan: a resourceful tool fitting the operators’ expectations

- In 2008, the Italian Legislative Decree n. 122 “Piano Nazionale per l’Edilizia Abitativa” introduced new flexible tools for public and private investors to support an improvement of the existing housing stress conditions.

- The program aims to increase the provision of residential units, introduce higher energy standards in housing, and promote public and private partnerships. With particular regards to the latter, article 1 “Six lines of intervention” entails:

1. The creation of an integrated national system of real estate funds aimed at increasing and valorizing the rental sector, promoting the creation of private-public delivering partnerships;
2. The expansion of public housing stock, through central and local resources;
3. The promotion of private developers’ involvement;
4. Funding opportunities for real estate cooperatives;
5. The promotion of social housing interventions, so-called Programmi di promozione di edilizia residenziale sociale; and
6. The development and completion of the interventions included in previous housing plans.

**Central Regulation**

- Integrated governance & competence
- Multi-dimensional implementation
- Resource mix
- Governance support at a local scale
- Coordination with the national Jurisdiction
- Coordinating with a trusting national
- Ethical and low risk profile
- Vulnerable groups targeted
The Local Funds: a resourceful tool fitting the operators’ expectations

- Flexible, Granted, Controlled & in Partnership…
- Main Subjects and proper role
  - LOCAL PUBLIC BODIES (Municipalities) providing areas and buildings at affordable price, or just in leasehold;
  - MAJOR PUBLIC AUTHORITIES (Regions) investing equity through local social housing programs;
  - MAJOR PRIVATE INVESTORS (Banking Foundations, Insurance Companies) whose involvement is a key driver to collect equity;
  - NO PROFIT ORGANISATIONS whose experience in social issues management and tenants discomfort it’s extremely useful;
  - The National Bank “Banca d’Italia” to which the Funds Regulation Approval is bound.
The Local Funds: a resourceful tool fitting the operators’ expectations

- Low risk and cost effective...
- Main Features and Mechanism
  - Profitability goal: 2% over the inflation rate
  - Local Technical Advisor: continuous support within the projects and the involved partners, being acquainted on the local issues and expected goals
  - Tax treatment of Real Estate Funds: income tax exempted, and other privileged conditions, 20% deduction on final revenues.
  - Debt and leverage
    - up to 60% of the Real Estate portfolio and up to 20% of the other investments
  - The CDP-Investment commitment, enabling to collect equity from a protected circuit of savings (40% on the tot portfolio). A note: the CDPI profitability expectation is around 3%-4% over the inflation rate

- **Rent Levels**: -25%; -30% compared to the market
- **Presence of non residential activities**
- **Exit Strategy**: final sale (at a revalued cost; pre-emption right for Public Local Bodies)
FASP
Fondo Abitare Sostenibile in Piemonte

• Threats elements
  - Development costs (area, buildings and start up)
  - Urban, social quality
  - Fair balance between offered rents and local Real Estate market
  - Real Estate mix, both in lease/sale and in residences/services
  - Rent levels mix
  - Additional free grants, where necessary
  - Use of revolving funds, thanks to the tenants’ equity
• Profitability levels distinction (depending on the Investor)

• Key tool: the feasibility control by means of an Economic-Financial Model. It is a shared tool between the partners
The setting of an EFM by the Technical advisor to demonstrate the Fund finance affordability

- It is a model developed for the FASP Fund, requested by the Compagnia di San Paolo to assess the future incoming cash-flows and to compare the different profitability and sustainability profiles. It depends on:
  - design choices
  - financial structure
  - promoter & investor type
  - management
- It works through hypothesis (parameters, depreciations, inflations, Gross profit margin, taxes, financial management and exit strategy variables)
- The outcomes concern financial ratios and results.
