## CONTENTS

**Tuesday 02.10.2007**

page

### Session 1

#### **Innovative photogrammetric techniques**

- Digital Presentation, Documentation and Analysis of Paintings, Monuments and Large Cultural Heritage with Infrared Technology, Digital Cameras and Range Sensors, Rizzi A., Voltolini F., Girardi S., Gonzo L., Remondino F., ITALY 631
- Fisheye Lens Camera System Application to Cultural Heritage Data Acquisition, Kedzierski M., Walvzykowski P., POLAND 809
- The Solid Image Web Viewer: A New Way For 3D Survey Data Web-Fruition, Agosto E., Picco I., Rinaudo F., ITALY 23
- Stereo-Panoramas: Problems and Solutions, Varshosaz M., Amini, IRAN 733
- The Multi-Image Spherical Panoramas as a Tool for Architectural Survey, Fangi G., ITALY 311

### Session 2

#### **Documentation and Archaeology**

- Documentation and Analysis of Archaeological Sites Using Aerial Reconnaissance and Airborne Laser Scanning, Doneus M., Briese C., Fera M., Fornwagner U., Griebel M., Janner M., Zingerle M-C., AUSTRIA 275
- Mapping Traditional Belief Systems and Establishing Contemporary Connections In An Ancient Cultural Landscape, Kasiannan S., AUSTRALIA 803
- The Frozen Tombs of the Altai Mountains Inventarisation and Conservation, Goossens R., De Wulf A., Bourgeois J., Gheyle W., Van Bever B., Vanommeslaeghe M., Dossche D., Devriendt D., BELGIUM 346
- The Governance of Identity. Recording Values of Rural Heritage in Urban Areas, Agostini S., Cairoli, ITALY 764

#### **Poster Session 1 – Photogrammetric Applications & e-Technology**

- 3D-Modeling of the Brazilian Antarctic Station Comandante Ferraz - A Visualization With Animation, Erwes H. J.B., Prado W.S., Fazan J.A., Fonseca E.S.Jr., BRAZIL 297
- New Trends in Digital Photogrammetry Teaching and Diffusion: The Z-GLIF Software, Menci L., Rinaudo F., ITALY 487
- Use of Historical Images for the Documentation and the Metrical Study of Cultural Heritage by Means of Digital Photogrammetric Techniques, Bitelli G., Girelli A., Marziali M., Zanutta A., ITALY 141
- The Integrated Survey for the Knowledge and the Documentation of the Archaeological Heritage: The "Villa Dei Misteri" in Pompei, Canciani M., Maestri D., Spadafora G., ITALY 193

To Teach Drawing in the University Degree In "Preservation and Restoration of Cultural Heritage" of University of Studies of Turin, in Venaria Reale (Italy), Spallone R., ITALY	685
Visible and Thermal IR Documentation of a Masonry Brickwork Building, Lerma J. L., Mileto C., Vegas F., Cabrelles M., SPAIN	456
Evaluation of Shape Capture as a Heritage Documentation and Monitoring Tool, Ouimet C., Robertson G., CANADA	553
Three-Dimensional Risk Mapping for Anti-Disaster Recording of Historic Buildings, Santana-Quintero M., Van Genechten B., BELGIUM	659
Data Gathering in Underwater Archaeology by Means of a Remotely Operated Vehicle, Conte G., Zanolì S., Scaradozzi D., Gambella L., Caiti A., ITALY	243
Simple Tools for Architectural Photogrammetry, Tsioukas V., GREECE	712
Mapping of Archaeological Areas Using a Low-Cost Uav: The Augusta Bagiennorum Test Site, Bendea H., Chiabrando F., Giulio Tonolo F., Marenchino D., ITALY	117
Obtaining Facade Plan of a Historical Building with Orthorectification of Single Images Gathered By Mobile Phones, and Digital Cameras, Aydar U., Avsar E.O., Altan M.O., TURKEY	89
Studies and Knowledge Fusion in Archaeological Site Maps Managed in a 3D GIS, Bonfanti C., Chiabrando F., Spano A., ITALY	153
Geomatic Contributions to Archaeological Investigations. The Case of Torrione of Pollenzo (Piedmont-Italy), Bonora V., Preacco C., Spano A., ITALY	159
Imagery Information on the Study of Cultural Heritage, Lazaridou M., Patmios E., ITALY	441
Experimenting with Museum and User Friendly Video Files Distribution Platform on the Web "Volumeone", Iwabuchi J., JAPAN	388
Digital Recording In Archaeological Excavation Using Tablet PC, Cianciarulo D., Guerra F., ITALY	227
Underwater Archaeological Knowledge Analysis and Representation in the Venus Project: A Preliminary Draft, Jeansoulin R., Papini O., FRANCE	394
3D Modelling by Advanced Total Station, Yildiz F., Karabork H., Yakar M., Altuntas C., Karasaka L., Goktepe A., TURKEY	749
Photogrammetry for Virtual Exploration of Underwater Archaeological Sites, Drap P., Seinturier J., Scaradozzi D., Gambogi P., Long L., Gauch F., FRANCE	281
Photogrammetric Documentation of the Vaults of Historical Monuments, Potuckova M., Stefanova E., Gril S., CZECH REPUBLIC	612
Documentation of Destroyed Parts of Monuments Using Low Cost Rectification Techniques, Antoniou G., GREECE	79
The Virtual Reconstruction of the "Titane" Archaeological Site (Greece) by Aims of Photogrammetry, Nuttens T., Goossens R., Tytgat C., De Wulf A., Van Damme D., Hennau M., Devriendt D., BELGIUM	544
Application Of Mixed Technique For The 3d Modelling Of The Noble Floor Of The Real Villa In Monza, Fassi F., Achille C., Brumana R., Tuncer H., ITALY	758

3D Survey Technologies for Reconstruction, Analysis and Diagnosis in the Conservation Process of Cultural Heritage, Salonia P., Bellucci V., Scolastico S., Marcolongo A., Messina T.L., ITALY	653
The Euphrates Channel Changes and Archaeology along Jebel Bishri in Syria, Lonnqvist M., Torma M., Okkonen J., Lonnqvist K., Nunez M., Latikka J., FINLAND	465
Visualization of the Architecture Through Simplified Models: Strategies for Knowledge Sharing Pieve a Socana, Casentino, Toscana, Battini C., Cornieti M., Fantini F., Iurilli S., ITALY	112
3D Digital Reconstruction of Hue Complex of Monuments (Vietnam) and Web Application for a Sustainable Urban Development, Pugnaroni F., Issini G., Fangi G., Dang M.N., ITALY	619
Improving Satellite Quickbird-Based Identification Of Landscape Archaeological Features Through Principal Component Analysis And Tasseled Cap Transformation, Lasaponara R., Masini N., ITALY	812
The Documentation of the Medieval Entrance of the Rhodes Fortification Complex, Gianniou P., Georgopoulos A., Tsakiri M., Della K., GREECE	334
Digital Geometric Documentation of the Rail Journey of the Historic Train of Pelion, Stamnas A., Georgoula O., GREECE	691

### Session 3

#### Laser Scanning and automation

UVACAD: A Software Platform for 3D Architectural Surveying, Perez-Moneo Juan-Diego, Tordable J., Finat J., Fernandez J.J., Sanjose J.I., SPAIN	828
Automated Modelling of Surface Detail from Point-Clouds of Historical Objects, Nothegger C., Dorninger P., AUSTRIA	538
Laser Scanning and Automatic Multi-Image Texturing of Surface Projections, Petsa E., Grammatikopoulos L., Kalisperakis I., Karras G., Pagounis V., GREECE	579
From the Relief to the 3D Reconstruction_ The Methodology, Moro A., Vassallo V., Vico L., ITALY	501

### Session 4

#### GIS in Cultural Heritage

Archaeological and Methodological Approaches for the Construction of an <i>Intrasite</i> And <i>Intersite</i> GIS of Elaiussa Sebaste (Turkey), Borgia E., ITALY	171
Spatial Information System For 3D Documentation Of Plaka, The Historical Center Of Athens, Charkiolakis N., Ioannidis Ch., Kantza Ch., Keramida I., Koumna A., Leni M., Georgopoulos A., GREECE	769
A GIS in Cultural Heritage Based Upon Multiformat Databases And Hypermedial Personalized Queries, Chias P., Abad T., Echeverría E., Da Casa F., Celis F., SPAIN	222
Using Smart Map in a Mobile Information Environment for Tourism, Malek M. R., Samany N., Aliabady S., Hajibabai L., Kashyha M., IRAN	471

Database "Monarch" for the Keeping and Processing of the Data on Cultural Heritage, Morozov S., Hookk D.Yu, Mazurkevich A.N., <b>RUSSIAN FEDERATION</b>	505
--	-----

**Wednesday 03.10.2007**

**Session 5**

**Low cost photogrammetric systems**

Cost-Effective Rock-Art Recording in a Production Environment: Is There a Wider Message?, Chandler J. H., Bryan P., <b>U.K.</b>	210
Implementation of a Low-Cost Photogrammetric Methodology for 3D Modelling of Ceramic Fragments, Kalantari M., Kasser M., <b>FRANCE</b>	405
A Tool to Help Mapping Planning in Close Range Photogrammetry, Bernardini A., Fangi G., <b>ITALY</b>	129
Low-Cost Image Based System for Non-Technical Experts in Cultural Heritage Documentation and Analysis, Boochs F., Heinz G., Huxhagen U., Mueller H., <b>GERMANY</b>	165
The 3D Photo-Logging System for Easy and Effective Recording and Understanding of Archaeological Sites, Kadobayashi R., Seike A., <b>JAPAN</b>	400

**Session 6**

**3D Reconstructions based on TLS point clouds**

Application of High Resolution Scanning Systems for Virtual Moulds and Replicas of Sculptural Works, Tucci G., Bonora V., <b>ITALY</b>	721
Documentation of the Geometry and Earlier Interventions of the Ancient Theater Of Dodona, Antoniou G., <b>GREECE</b>	73
3D Height Accuracy Survey and Modelling of one of Aosta's Anthropomorphic Stelae, Bornaz L., Poprorato Ch., Rinaudo F., De Gattis G., Focareta R., <b>ITALY</b>	176
Integrating Laser Scanning, Multispectral Imagery and GIS In C&R Documentation Practices: A First Approach Using two XVITH Century Wood Paintings from Convento De Cristo In Tomar, Pires H., Marques P., Henriques F., Oliveira R., <b>PORTUGAL</b>	596

**RecordIM Session**

Partnership in Learning: English Heritage & the Raymond Lemaire International Centre for Conservation, Andrews D., Bedford J., Blake B., Clowes M., Crispe A., Popworth H., Quintero M.S., <b>U.K.</b>	67
Guiding Principles and Illustrated Examples. Recording, Documenting and Information Management for the Conservation of Cultural Heritage Places, Eppich R., LeBlanc F., Chabbi A., Letellier R., <b>USA</b>	775

**Session 7**

**Service for the Restoration of Acropolis Monuments**

Principles and Methodology of Intervention for Structural Restoration, Ioannidou M., <b>GREECE</b>	376
Parthenon Restoration Project, Toganidis N., <b>GREECE</b>	706
The Surface Conservation Project of the Acropolis Monuments: Studies and Interventions, Papakonstantinou E., Panou A., Franzikinaki K., Tsimereki A., Frantzi G., <b>GREECE</b>	557
The Restoration of the Superstructure of the Propylaia Central Building: Study and Intervention, Tanoulas T., <b>GREECE</b>	840

**Poster Session 2 – Archaeology & Conservation – GIS**

Computerization and Management of Archive Sources for the Study of Urban Cultural Heritage, Lelo K., Travaglini C., <b>ITALY</b>	450
The Roman City of Uxama Argeala (Soria, Spain) and its Study by Means of Remote Sensing and Digital Cartography, Gillani G., <b>SPAIN</b>	340
Rapid Approach of Integrated Survey for the Conservative Analysis of Pictures, Costantino D., Angelini M.G., Caprino G., <b>ITALY</b>	247
Myanmar: A Comparison Between Past and Present. What is Happening in the Field of Architectural Heritage Conservation: The Techniques Used, the Principles of Preservation Applied and the Relative Plans for Heritage Management, Messeri B., <b>ITALY</b>	491
Outcome of the Representation of Architecture: Image and Memory, De Masi P., De Masi A., <b>ITALY</b>	265
Integrated Methodologies and Technologies for the Reconstructive Study of Dur-Sharrukin (Iraq), Cultraro M., Gabellone F., Scardozzi G., <b>ITALY</b>	253
Recording for Urban Planning: A Case from Manama, Bahrain, Elwazani S.A., Lerma Jose Luis, <b>SPAIN</b>	293
Contribution of Laser Scanning, Photogrammetry and GIS to an Interdisciplinary Special Research Program on the History of Mining Activities (SFB HIMAT), Hanke K., <b>AUSTRIA</b>	366
The Volponi's Kiln in Urbino. Industrial Archaeology and Historic Landscape in the Cradle of the Renaissance. Documentation, Survey and Drawing, Agostinelli M., Clini P., Lancioni N., Quattrini R., Sabbatini G., <b>ITALY</b>	17
National Historic Sites Of Canada: A Values-Based Approach to Posterity Heritage Recording, Leboeuf J.-F., Quimet C., Lumsdon C., Zvonar J., Utas G., <b>CANADA</b>	445
Digital Documentation of Monuments of Natural Beauty: A Case Study, Stylianidis E., <b>CYPRUS</b>	696
Traditional Drawings Versus New Representation Techniques, Almagro A., Almagro Vidal A., <b>SPAIN</b>	52
WEBGIS Open Source Solutions for the Documentation of Archaeological Sites, Agosto E., Ardissone P., Rinaudo F., <b>ITALY</b>	29

Raw Materials Project. Archaeological WEBGIS with Googlemaps API, Cantoro G., <b>ITALY</b>	199
Utilizing Geographical Information System (GIS) & Satellite Remote Sensing Analysis for Integrated Planning: A Case Study of Paphos District Area - Unesco World Heritage Town (Paphos, Cyprus, Hadjimitsis D., Themistokleous K., <b>CYPRUS</b> )	362
Moving Towards Conscious Preservation of the Architectural Heritage: Creating A New Professional Role, Bardelli P.G., Guagnini A., <b>ITALY</b>	108
Multimedia Database for the Heritage Information System of the Ancyra Project, Gabrielli M., Malinverni E.S., <b>ITALY</b>	323
An Important Middle Bronze Age Cemetery at West-Central Anatolia: Dede Mezari, Kocak O., Uyumez M., Cay T., Ilasli A., Iscan F., <b>TURKEY</b>	418
The Land and City of Tarhuntassa Geodetic Researches Around it, Bahar H., Cay T., Iscan F., <b>TURKEY</b>	93
Spatial Information System For Historic Buildings, Gunay S., <b>TURKEY</b>	792
The Completion The Conservation Plan For The M.Kogalniceanu Street Church, Cluj Napoca, Romania, Maksay A., Pirez H., Kandra L., Makay D., <b>ROMANIA</b>	823
GIS Application in Archaeological Site of Solunto, Tantillo M. D., <b>ITALY</b>	702
Innovative Systems for Assisted Analysis and Diagnosis, Appolonia L., Moltedo L., Picco R., Salonia P., <b>ITALY</b>	84
In Sicilian Ancient Theatres Interventions of Restorations in Sicily, Ruggirello V.L., <b>ITALY</b>	647
The Use of 3D Reconstruction for Architectural Study: The Asklepieion of Ancient Messene, Yoshitake R., Ito J., <b>JAPAN</b>	752
Survey Procedure And Archaeological G.I.S Data Base for the Medieval Mine of Rocca San Silvestro, Bianchini L., Chiaverini I., Ostuni D., <b>ITALY</b>	135
Poggioreale Old Town In Sicily: Strategies, Memory, Knowledge And Planning Place, Guglielmini R., <b>ITALY</b>	786
The Use of GIS Technology in Culture Heritage, Petrescu F., <b>ROMANIA</b>	573
Architectural Patrimony Management in Yemen, Heno R., <b>FRANCE</b>	371
Customized GIS Environment for Integrated Management of Archaeological Research Data, Roustanis T., Kaimaris D., Georgoula O., Patias P., <b>GREECE</b>	643

### Session 8 Architectural Heritage Conservation

Digital Management of the Documentation of the Acropolis Restoration, Mallouchou- Tufano F., Alexopoulos Y., <b>GREECE</b>	475
Art Work In Historic Sikh Shrines : Need for their Documentation and Conservation, Singh B., <b>INDIA</b>	668

Artistic Heritages: From Knowledge to Valorisation, Di Natale E., Lanzarone F., ITALY	271
Documenting Architectural Heritage In Bahia - Brazil, Using Digital Technologies, Amorim, A. L., BRAZIL	61
NDT Detection of Decay Areas and Evaluation of their Attributes, Kapsalas P., Zervakis M., Maravelaki-Kalaitzaki P., Delegou E.T, Moropoulou A., GREECE	409

**Session 9**  
**Information Technology and Cultural Heritage**

Digitising Aegean Bronze Age Buildings: Building Typologies From Digital Plans, Constantinidis D., AUSTRALIA	238
Merging Augmented Reality Based Features in Mobile Multimedia Museum Guides , Damala A., Marchal I., Houlier, M., FRANCE	259
Robust Shape Fitting and Semantic Enrichment, Torsten U., Fellner D. W. , AUSTRIA	727

**Friday 05.10.2007**

**Session 10**  
**Modelling Laser Scanner data**

Digitization of the Collection of Moldings of the University Marc Bloch in Strasbourg :A Study Case, Smigiel E., Callegaro P., Grussenmeyer P., FRANCE	674
The Imprint of a City: Massa Marittima, Micoli M., Nomikou Tz., ITALY	497
Laser Scanning for Historical and Geotechnical Studies at Pointe du Hoc, Warden R., Burt R., Briaud J.L., Everett M., USA	845
Facade Modelling for Historical Architecture, Bohm J., Haala N., Becker S., GERMANY	147

**Session 11**  
**Archaeological conservation**

Social and Spatial Patterns of Cultural Heritage, Charalambous N., CYPRUS	216
Basic Idea and Material: An Integrated Approach, from the Knowledge to the Conservation, Ientile R., Marotta A., Rinaudo F., De Bernardi M. L., Chiabrande F., De Santis A., Naretto M., ITALY	382
Documentation and Monitoring of Intangible Cultural Heritage – A 21 <sup>st</sup> Century Approach, Robinson E.-J., U.K.	637
Influence of the Substrate Colour on the Visual Appearance of Gilded Sculptures, Dumazet S., Genty A., Zymla A., De Contencin F. X., Ruscassier N., Bonnet B., Callet P., FRANCE	287

**Session 12**  
**e-Technology, Education and Training**

A Digital Future for Cultural Heritage, Mudge M., Ashley M., Schroer C., USA	521
--	-----

The Project of the Italian Culture Portal. A Standard Based Model for Interoperability Amongst Cultural Heritage Data Sources, Masci M.-E., Buonazia I., Merlitti D., ITALY	481
A Virtual Collaborative Environment for Archaeology Through Multi-User Domain in the Web, Pietroni E., Forte M., ITALY	585
Cultural Heritage Inventory System of Turkey on the Web, Cayirezmez A., TURKEY	207
State of the Art in Built Heritage Internet Applications: Which Trends are Leading this Field?, Lancia R., ITALY	429

### Poster Session 3 – Laser Scanning – Animation & Modeling

Ajax Web Scripting Applied to Interactive Stereoscopic Imaging , Pomaska G., GERMANY	602
Laser Scanner & Photogrammetry for the Survey of the Monumental Cemetery in Piazza Del Duomo, Pisa (Italy), Caroti G., Piemonte A., ITALY	201
Recording and Virtual Modelling of a Roman Villa Through Laser Scanning, Aguilera G. D., Gomez J., Munoz A.L., Herrero J.S., SPAIN	35
First Experiences with the Deformation Analysis of a Large Dam Combining Laserscanning and High-Accuracy Surveying, Aguilera G. D., Gomez J., Sanchez A., Sanchez J.A., SPAIN	40
3D Buildings Modelling Based on a Combination of Techniques and Methodologies, Pop G., Bucksch A., Gorte B., ROMANIA	607
Using Hybrid Surveying Techniques for Documenting the Largest Ancient Theatre in Greece, Vozikis G., GREECE	739
“2 Different Techniques of Scanning Culture Heritage” 1.Close-Range-Scanning of 250 Clay figurines in Xian, China, 2.Laser-Scanning of 3.200 Dinosaur-Steps in Sucre, Boliva, Linsinger S., AUSTRIA	460

## 3D DIGITAL MODELLING AS A METHOD FOR THE RECONSTRUCTION OF THE HISTORICAL IMAGE OF THE CITY: THE CASE OF PIAZZA BODONI IN TURIN (ITALY) AT THE END OF NINETEENTH CENTURY.

R. Spallone<sup>a</sup>

<sup>a</sup>DINSE, I Facoltà di Architettura del Politecnico di Torino, Viale Mattioli 39, 10125 Torino, Italy, - [roberta.spallone@polito.it](mailto:roberta.spallone@polito.it)

**KEY WORDS:** Architecture, Digital, Modelling, Reconstruction, Research, CAD, Representation

### ABSTRACT:

The experience that I want to present consists of the case of piazza Bodoni in Turin, characterized, between 1866 and 1924 by the presence of an original pavilion dedicated to market.

The 3D digital reconstruction allows to recognize the role that the building of the market plays in the characterization and identification of this specific urban location as an essential element in the image of the city.

To reconstruct the architectural and urban morphology of the place, I have conducted researches on iconographical records of the urban setting and of the historical market at the Turin city archives. In my researches I discovered a large number of tables, consisting of city plans of the area and architectural designs of the buildings around the square.

The research project was also based on other information culled from period photographs sources in others archives and in bibliographic sources.

The rich iconography that emerged from the archival records has enabled me to address the research to an attempt to simulate the activities of market that existed historically within his specific location.

The data drawn from historical-archival and bibliographical sources were compared and integrated with the planimetric and altimetric survey, prepared by me, of still existing buildings.

I designed the virtual piazza Bodoni with its market, consisting in a closed pavilion that was demolished in the 1920s.

The 3D perspective visualizations of the square, revealed an image that reminds the paintings of the "ideal cities" of Italian Renaissance.

### 1 TO RECONSTRUCT FOR RECOGNIZING IN THE PRESENT THE HISTORICAL IMAGE OF THE URBAN FABRIC.

"... to reconstruct means to collaborate with the time in his shape of 'past', to pick up the spirit or to modify it, to stretch it out, almost, towards a longer future, means to discover under the stones the secret of the springs..."

Marguerite Yourcenar, *Mémoires d'Hadrien*, 1951

The reconstruction of the historical images of a urban fabric, as well as of buildings or complexes, allows viewing through its present aspect the different looks it had in the past, and recognizing their traces.

Thanks to digital modelling it is possible to go back in the time and to recover images of places today modified.

Besides thanks to digital modelling, the 3D visualization of the

morphological transformations of the urban fabric in various historical periods makes it possible to share this information and diffuse it in a readily understandable form to a wide-ranging spectrum of public.

The urban setting of "piazza Bodoni" in Turin nowadays appears to the visitor as an unitary composition of buildings of the second half of nineteenth century, characterized by homogeneous style and, on the southern side, by a continue curtain with arcades.

Only one building, on the southern-eastern side of the square, shows as a contemporary architecture of the second half of the twentieth century.

As a matter of fact, another building on the eastern side of the square, the Conservatoire of Music of Turin, had not origin in the same period of the other buildings of the urban fabric.

It was built at the end of 1920's, in place of a not very well-know building, sometimes described as "octagonal pavilion",

Figure 1. Plan of piazza Bodoni with the shed of the market in the half of nineteenth century (ASCT, Tipi e disegni, 15.5.126/3)

Figure 2. Plan of the shed of the market in the half of nineteenth century (ASCT, Tipi e disegni, 15.5.126/2)

demolished in 1924.

It was a closed pavilion, built between 1864 and 1866, in function as market and public wash-house.

It originated along with the urban setting it had been inserted into. Its location was one that was originally in the outskirts of the city, along the town's southern barricades. The space was cleared when the eighteenth-century walls were knocked down.

As is documented in some archival records, the activities of market in this place preceded the construction of the pavilion. In the half of the nineteenth century on the western side of the square there was a U-shaped shed, for the wholesale of fruits and vegetables and, on the northern side, forty moveable stands (figure 1).

An iconographical record of the shed (figure 2) shows the distribution of the 65 stands under cover and the merchandise sold (vegetables, legumes, flours, cheeses, butter, poultry, lambs, fishes, cooked foods).

Around the shed there were other 30 stands.

A record of 1857, together with a historical view (figure 3), supports by document the presence in the square of pedlars of vegetables, eggs, poultry, butter and fruits.

In 1863 the Municipality deliberated the building of the new pavilion, on the eastern side of the square, to replace the old shed.

The engineers Edoardo Pecco and Carlo Velasco designed (1864-1866) a square-shaped building surmounted by an octagonal drum (figure 5).

The report and the drawings were published in the magazine "Il Giornale del Genio Civile" (1865) in which it is affirmed that the nearly finished building "is good for the beauty and for the regularity of the square".

The pavilion was built on two floors: on the ground floor there was the market with 300 ring-shaped fixed structure of the stands, on the underground floor there were the public wash-house and 180 stock yards.

It was built with bricks and stones walls and covered by wood, iron and cast iron structure.

In the market were sold: meat, poultry, butter, eggs, tripe, cheeses, pasta, fishes, fruits and vegetables.

In 1888 an extraordinary snowfall caused the fall down of the roof; the structure was rebuilt completely in metal by design of Carlo Velasco (figure 7).

In 1893 the interior of the pavilion was modified: the number of stands was reduced from 300 to 118 (with different distribution), and two large stock yards were built (figure 6).

In 1924 the Municipality deliberated the demolition of the pavilion.

The 3D digital reconstruction allows to recognize the role that the building of the market plays in the characterization and identification of this specific urban location as an essential element in the image of the city.

To reconstruct the architectural and urban morphology of the place, I have conducted researches on iconographical records of the urban setting and of the historical market at the Turin city archives.

Figure 4. Piazza Bodoni in an old postcard, (1904)

Figure 5. Pavilion for market and wash-house, ("Il Giornale del Genio Civile", 1865)

In my researches I discovered a large number of tables, consisting of city plans of the area and architectural designs of the buildings around the square. On the bases of archival records it was possible to reconstruct the shape of the urban fabric with the pavilion between 1893 and 1924 (figures 8-9).

Figure 6. Plan of the ground floor of the market, after 1893, (ASCT, Collezione Q XIV, n. 5, lotto VIII)

The research project was also based on other information culled from period photographs sources in others archives and in bibliographic sources.

The rich iconography that emerged from the archival records has enabled me to address the research to an attempt to simulate the activities of market that existed historically within his specific location. The data drawn from historical-archival and bibliographical sources were compared and integrated with the planimetric and altimetric survey, prepared by me, of still existing buildings.

## 2. 3D DIGITAL MODELLING FOR VISUALIZING THE HISTORICAL RECONSTRUCTIONS.

The reconstruction of the historical evolution of a urban fabric allows viewing through its present aspect the different looks it had in the past, and recognizing their traces.

Francesca Cataliotti wonders about the purpose of such studies, and suggests possible answers. "Why reconstruct? Perhaps is it possible to restore the identity, the sense of *unicum*, by adding up fragments and appearances?"

We reconstruct because of a sort of intellectual pleasure which the architect cannot do without, because of the necessity to satisfy that romantic taste of reviving, if only on the drawing board, the original shape of the ancient monument, in order to understand what has disappeared, in part or whole,... or, perhaps, is it the architecture itself that asks to be represented in order to be understood and enjoyed at a distance, in time and space?

The reconstructive representation is, first of all, a way to understand the object and could become an important tool of historic and iconographic research...". (Cataliotti, 2001)

3D digital modelling offers in this respect a powerful method of checking hypotheses. Notes Gabriele Rossi: "in a 3D digital model, the complexity of the representation gives way to an illustrative schematization which has, in any case, better spatial control of the object and far exceeds the traditional static axonometric and perspective forms of representation.

The model thus becomes an essential tool to check and control the validity of reconstructive hypotheses". (Rossi, 2000)

Figure 7. Carlo Velasco, structure of the roof, 1888 (ASCT, Tipi e disegni, 15-5-63)

Figure 8. 2D and 3D reconstruction of the pavilion for market and wash-house, (Drawing and model by Roberta Spallone)

### 3. 3D DIGITAL MODELLING AS A TOOL FOR KNOWLEDGE.

3D digital modelling, a technique of representation by now widely consolidated in the various design phases, is presently stirring a renewed interest for the survey of existing structures.

This is, on the one hand, due to the natural connection with the most innovative methodologies of instrumental survey. On the other, it is a consequence of the wide-ranging potential applications in the fields of critical thematic analyses and of spatial and temporal simulation: “*digital mock-ups* [...] allow a richer and more controlled interaction between user and model [...] *digital mock-ups* are able to cover, within a unique representation system, the entire range of possible modelling”. (Maldonado, 1992).

The quick evolution of digital technologies, hardware and software, makes it ever easier to build 3D models of considerable geometrical complexity.

A critical selection of data, first of all in respect of the relationship between scale and contents of the representation, is absolutely essential to avoid, in the modelling phase, very complex procedures adding insignificant detail which uselessly increases the size of the digital file. In this respect it should be considered that the most suitable support for the visualization of the model in its space-time dimensions usually is the monitor of a personal computer.

While 2D digital drawings now usually implement a level of detail that is greater than the level achieved, for the same scale of reduction, in a traditional drawing, it is most appropriate to simplify 3D digital modelling by implementing primitive solids, by analogy with material plastic modelling.

3D digital modelling complements drawing as an information and communication tool, while adding, as a specific prerogative, the possibility to enter the fourth dimension.

This important aspect is underlined by Claudio Moriconi, who observes that “with the digital support the drawing simulates the hypothetical reality, overcomes static limitations and allows interacting with any kind of sign.

By creating virtual images, digital graphics is probably the most suitable tool to interpret the complexity of reality [...]”. (Moriconi, 2001)

The creation of a 3D digital model offers, as a result, infinite possibilities of observation: from the objective visualization of a cylindrical projection, to the subjective visualization of a

conical projection. In this respect Mario Docci and Riccardo Migliari state that: “modelling is not only a creative strategy, but also a cognitive one. Digital models allow 3D simulations... Computerized models are conceived as 3D systems, real *maquettes* that live in a virtual space perfectly corresponding to a real space, so much so that they encompass all four dimensions. They are visible through a screen, a window (which reminds the window of Alberti’s *perspectiva artificialis*). This window visualizes the models in a 2D space that can be perceptive (in a central projection) or measurable (in a parallel projection), with the capability to vary the point of view so as to simulate the mobility and the transformability in time and appearance”. (Docci, Migliari, 2000)

The urban fabric of piazza Bodoni characterized, between 1866 and 1924 by the presence of an original pavilion dedicated to market, was a test case of the potential of 3D digital modeling for the historical reconstruction.

Thanks to digital modelling, the 3D visualization of the morphological transformations of the urban fabric as well as of buildings or complexes in various historical periods makes it possible to share this information and diffuse it in a readily understandable form to a wide-ranging spectrum of public.

“The digital techniques of representation make it possible to create a picture of the situation before and after the intervention, and to rebuild, if necessary, the stratification too.

The era of graphic papers that only the specialists can decipher is over. Now the very users of a building or of an urban complex can appreciate spaces [...] before during and after its irreversible transformation”. (Moriconi, 2000)

### 4. INTEGRATED METHODOLOGIES OF ANALYSIS: FROM ARCHIVAL, ICONOGRAPHICAL AND BIBLIOGRAPHICAL RESEARCHES, TO DIRECT METRICAL SURVEYS, TO 3D MODELLING.

The reconstruction of the evolution of the buildings required the geometric modelling of the exterior. This was based on data drawn from historical-archival, iconographical and bibliographical sources integrated with the recent planimetric and altimetric survey by Roberta Spallone (Calorio, Spallone, 2001), and additional measurements directly taken in a survey of the exterior.

3D digital modelling required a critical selection of the data

with the goal of simplifying the representation of the geometrical external shape, of the buildings. For the reconstruction of the demolished pavilion, based on a work published in a historic magazine (*Giornale Genio Civile*, 1865), on archival iconographical records, on archival photographs (Fondazione Torino Musei, Fondo Gabinio). The AutoCAD 2006 software package was used for the

preparation of the 3D digital model, for different visualizations and for renderings.

The model was used to produce a set of axonometric and perspective views of the exterior.

The 3D perspective visualizations of the square, revealed an image that reminds the paintings of the "ideal cities" of Italian Renaissance.

Figure 9. 3D reconstruction of the pavilion for market and wash-house, (model and rendering by Roberta Spallone)
