EDITORIAL

SV **Conference track contents**

SXXV **Foreword** *Paul Atkinson*

SXXVI **Introduction: Designing a Design Conference** *Loredana Di Lucchio, Lorenzo Imbesi*

SXXVIII **Keynote speakers**

SXXIX **About**

SXXX **People**

SXXXII **Conference Tracks & Track Chairs**

S1 **Design for Next Challanges** *Loredana Di Lucchio*

S9 **Design for Next Design** *Lorenzo Imbesi*

CONFERENCE TRACK CONTRIBUTIONS

S16 **Design for Next Aesthetics**

S411 **Design for Next Economy**

S732 **Design for Next Education**

S1558 **Design for Next Environment**

S1978 **Design for Next Health**

S2592 **Design for Next Industry**

S2858 **Design for Next Society**

S3643 **Design for Next Technology**

S4171 **Design for Next Thinking**

S4671 **Workshops**

S4726 **Posters**

Conference Track contributions

DESIGN FOR NEXT AESTHETICS

S16 **A Framework For Product Design Based On Semantic Attribution Process** *Itsaso Gonzalez, Este Val, Daniel Justel, Ion Iriarte*

S28 **A Semiotic Rosetta Stone: Developing a Designer-centric Meta-language of Pragmatic Semiotics** *Dave Wood*

S38 **Aesthetic Justice. Design for a blind-spot culture**
Peter Buwert

S49 **Aesthetics in Design Semiotics Research. Developing foundations to better comprehend cultural habits and codes in bottom-up design processes** *Felipe Domingues, Salvatore Zingale, Dijon De Moraes*

S63 **Aesthetics of futures. Shaping shared visions of tomorrow**
Manuela Celi, Elena Formia

S77 **An Art-based research laboratory translated into a Critical Design strategy**
Raphaële Bidault-Waddington

S89 **Beautiful interfaces. From user experience to user interface design**
Letizia Bollini

S102 **Building networks for knowledge exchange, and design strategies for climate futures.**
Henry Mainsah, Andrew Morrison, Håkan Edeholt

S110 **Can Timelessness through Prototypicality Support Sustainability? A Strategy for Product Designers** *Rachel Flood Heaton, Deana McDonagh*

S122 **Contested Surfaces. Aesthetics of Colonization for Urban Coexistence**
Adriana Cuéllar, Marcel Sanchez Prieto

S134 **Creative Interpretation in Web Design Experience**
Johanna Silvennoinen, Rebekah Rousi, Laura Mononen

S146 **Design fiction, culture and climate change. Weaving together personas, collaboration and fabulous futures** *Andrew Morrison, Alittea Chisin*

S160 **Design for Next… Year. The Challenge of Designing for Material Change**
Ben Bridgens, Debra Lilley

S172 **Entropy: Unpacking the form through post digital making**
Evelina Kourteva, Dermott Mc Meel

S184 **Exploring aesthetics through digital jewellery**
Maarten Versteeg, Johanna Kint

S196 **Future Aesthetics of Technology; context specific theories from design and philosophy of technology** *Wouter Eggink, Jeroen Snippert*

S209 **House and Yacht: the Aesthetics of the Interior as a Link between Different Sectors**
Mariateresa Campolongo

S219 **Living on the Edge: design artefacts as boundary objects**
Michael Pierre Johnson, Jen Ballie, Tine Thorup, Elizabeth Brooks

S236 **"Make it beautiful". An old request with difficult academic answers**
Silvia D. Ferraris, Lucia Rampino, Venere Ferraro

S249 **Metamorphosis of design. The aesthetics of the dark side** *Francesca La Rocca, Chiara Scarpitti*

S261 **Metaphorical spaces. The art used by designers to explore, experiment and express concepts of Interiors** *Raffaella Trocchianesi, Matteo Pirola*

S273 **Micronarratives as the form of contemporary communication**
Simona Venditti, Francesca Piredda, Walter Mattana

S283 **Network Time Where it Counts. Temporality and Critical Approaches to Infrastructure**
Tom Schofield, Gabriella Arrigoni

S294 **Reimagining cinema: searching for an aesthetic of interaction design through cinema**
Nicolas Marechal, Joel Karamath

S304 **Returning the aesthetics to the heart of the design process. On the conflict between social design and product beauty** *Mario de Liguori*

S317 **Self-organized matter: design and primitive future of the eidetic categories**
Fabrizio Gay, Irene Cazzaro

S332 **Semiotics and design: Towards an aesthetics of the artificial**
Matthew Holt

S342 **Smart Solutions, "Smart Aesthetics"?**
Anna Cecilia Russo, Marinella Ferrara

S354 **The Aesthetics of The Artificial – Critical Design's Lost Dominion**
John Knight

S365 **The design of surfaces, between empathy and new figuration**
Spartaco Paris

S375 **The New Aesthetic of DIY-Materials**
Camilo Ayala-Garcia, Valentina Rognoli

S390 **Who's in charge? End-users challenge graphic designers' intuition through visual verbal co-design** *Simone Taffe*

S401 **Wrapping Cultural Values: using Social Embodiment as Stimulus in Designs**
Lizette Reitsma, Elise van den Hoven

DESIGN FOR NEXT ECONOMY

S411 **Adding plus value to development aid projects through design strategy: experiences from Pakistan** *Gwendolyn Kulick*

S424 **Beyond customer satisfaction. Supporting organisational change through Service Design. A case study in the insurance industry** *Ion Iriarte, Alazne Alberdi, Elisabeth Urrutia, Daniel Justel*

S435 **Big Data: Understanding how Creative Organisations Create and Sustain their Networks**
Fraser Bruce, Jackie Malcolm, Shaleph O'Neill

S444 **Co-creating finances. A new perspective on designing for the financial world.**
Santiago de Francisco Vela

S457 **Design and Academic Entrepreneurship. The Role of Design in Spin-off Processes**
Anna Sinell, Franziska Brodack, Sebastian Denef

S469 **Design and design management in the incubation phase of high-tech start-ups**
Claudia Acklin, Andres Wanner

S479 **Design-driven innovation: Making meaning for whom?**
Heleen de Goey, Per Hilletofth, Lars Eriksson

S492 **Designing for the next (Circular) Economy. An appeal to renew the Curricula of Design Schools** *Michael Leube, Dominik Walcher*

S502 **Discussing a New Direction for Design Management through a New Design Management Audit Framework** *Fulden Topaloğlu, Özlem Er*

S522 **Hacking the organization: Organizational Transformation by Design**
Hans Kaspar Hugentobler

S531 **Involving stakeholders towards service implementation. Co-designing change of practices using a visual language** *Tim Overkamp, Freya Ruijs*

S550 **Materiality Matters: Exploring the use of design tools in innovation workshops with the craft and creative sector in the Northern Isles of Scotland** *Cara Broadley, Katherine Champion, Lynn-Sayers McHattie*

S566 **New Design Thinking Tools for the Next Generation of Designer-Entrepreneurs**
Sara Colombo, Cabirio Cautela, Lucia Rampino

S581 **Raising new opportunities for the Next Economy by exploring variable user needs for Computational Co-Design** *Viktor Malakuczi*

S589 **Rethinking the Fashion Collection as a Design Strategic Tool in a Circular Economy**
Ulla Ræbilda , Anne Louise Bang

S600 **Service Design as a Cultural Intermediary. Translating cultural phenomena into services**
Claire Dennington

S614 **Service design as the ground for alternative social and economic scenarios**
Maria Antonietta Sbordone, Nicola Morelli

S622 **Setting-up a Design Factory within a Creative Science Park @Aveiro Region**
Teresa Franqueira, Cátia Pereira, Raul Pinto, Gonçalo Gomes

S635 **The choice of design. From businesses' conditions to businesses' attitudes**
Mariana Fonseca Braga

S647 **The Commodity of Trade in Contemporary Design**
Giovanni Innella, Paul Anthony Rodgers

S669 **THE FUTURE OF DESIGN SUPPORT: What Can We Learn From Design Support Experience in the UK, Estonia and Turkey?** *Melehat Nil Gulari, Ruth-Helene Melioranski, Ozlem Erc , Chris Fremantle*

S681 **The Value of Agile Methods in Designing for Behavioural Change: A Case Study** *Dirk Ploos van Amstel, Martine Heemskerk, Reint Jan Renes, Sander Hermsen*

S691 **The Value of Design in Innovation: results from a survey within the UK Industry** *Ricardo J Hernandez, Rachel Cooper, Bruce Tether, Emma Murphy*

S705 **Universities' experience with brand. The role of design in managing university communication and branding.** *Veronica Dal Buono, Fulvio Fortezza*

S721 **Why do I love you Vaatelainaamo? Analysis of motivations, barriers and opportunities in a Finnish service for sharing clothes** *Rosana Aparecida Vasques, Mikko Koria, Maria Cecilia Loschiavo dos Santos*

DESIGN FOR NEXT EDUCATION

S732 **A contemporary didactics of innovation in product design. Grip Factors identification and evaluation** *Marco Mancini*

S745 **A conversation with material**
Nicolai de Gier

S754 **A Design Thinking approach to introduce entrepreneurship education in European school curricula** *Ester Val, Itsaso Gonzalez, Ion Iriarte, Amaia Beitia, Ganix Lasa, Maite Elkoro*

S767 **A design-relevant mindfulness device**
Fernando Rojas, Stuart English, Robert Young, Nicholas Spencer

S781 **A dialogical model for studio critiques in Design Education**
Gaia Scagnetti

S792 **A Future Scenario for a Methodological Approach applied to PhD Design Research. Development of an Analytical Canvas** *Violeta Clemente , Katja Tschimmel, Fátima Pombo*

S803 **A Multilevel Approach for Social Transformations and its Implications on Service Design Education.** *Nicola Morelli, Amalia De Götzen*

S814 **Advanced Design as a paradigm for design education: learning systems within its platforms and practices** *Roberto Iñiguez Flores, Ruth León Morán*

S822 **Algorithmic Futures. The Analog Beginnings of Advanced Parametric Design in First Year Studios** *Patrick Sean Rhodes*

S835 **An Interdisciplinary Design Education Framework**
Hye-Jin Nae

S848 **Best Practices in Design Education Leads to a New Curriculum**
Ana Thudichum Vasconcelos

S859 **Creative puzzlement: how deconstructing elements of object facilitates industrial design student's imagination** *Neil Smith, Shiro Inoue, Nick Spencer, Andy Tennant*

S875 **Culture as a design "next": Theoretical frameworks to guide new design, development, and research of learning environments** *Tutaleni I. Asino, Lisa A. Giacumo, Victoria Chen*

S886 **Dealing with wicked problems, in messy contexts, through prototyping**
Bo Westerlund, Katarina Wetter-Edman

S900 **Design as a process tool of collaborative and multidisciplinary learning in society**
João Bernarda, Ana M. Ferreira, Carlos Silva, Inês Queiroz

S915 **Design Culture in school. Experiences of design workshops with children**
Fabrizio Pierandrei, Elena Marengoni

S927 **Design for social change and design education: Social challenges versus teacher-centred pedagogies** *Nicos Souleles*

S937 **Design for Social Sustainability. An educational approach for insular communities**
Valentina Vezzani, Susana Gonzaga

S952 **Design ResearchScape. A visual exploration of Design Research publications**
Stefano Perna

S964 **Design Thinking for Textiles: let's make it meaningful** *Louise Valentine, Jen Ballie, Joanna Bletcher, Sara Robertson, Frances Stevenson*

S977 **Design Thinking: A New Road Map In Business Education**
Gözde Çeviker-Çınar, Gökhan Mura, Melike Demirbağ-Kaplan

S988 **Designing a cultural event as an inclusive educational activity**
Davide Fassi, Agnese Rebaglio, Annalinda De Rosa

S1000 **Designing Design Education. An articulated programme of collective open design activities**
Luisa Collina, Laura Galluzzo, Stefano Maffei, Vanessa Monna

S1014 **Designing more responsible behaviours through Design Education: Reflections on a Brazilian pilot experience in Social Innovation for Sustainability** *Viviane G. A. Nunes*

S1026 **E-LEARNING AND DESIGN PRACTICE. Tools and methods for professional learning of strategic design approach** *Arianna Vignati, Luca Fois, Michele Melazzini, Xue Pei, Francesco Zurlo*

S1037 **Facebook as a Boundary Object in Industrial Design Studio. A SoTL Study**
Işıl Oygür, Selen Devrim Ülkebaş

S1048 **Flourishing in graphic design education: incorporating Ubuntu as a curricular strategy.**
K.A. Chmela-Jones

S1058 **From a master of crafts to a facilitator of innovation. How the increasing importance of creative collaboration requires new ways of teaching design.** *Andrea Augsten, Moritz Gekeler*

S1072 **Getting Creative Again. Getting Creative Again**
Josiena Gotzsch

S1080 **Human and Technological Dimensions of Making in FabLab**
Iván Sánchez Milara, Georgi V. Georgiev, Jukka Riekki, Jani Ylioja, Mikko Pyykkönen

S1093 **Ikebana: A Collaborative Design Pedagogy**
Rachel Kelly

S1106 **Infusing management education with design to foster resilience, adaptability and flexibility** *Noemi Sadowska, Lorna Dallas-Conte*

S1118 **Interrogating Futures in Industrial Design Education**
Saliha Türkmenoğlu Berkan, Özlem Er, Wolfgang Jonas

S1130 **Is Design a Plus? A dilemma of disciplines when implementing design into academic education** *Søren Bolvig Poulsen, Peter Vistisen, Sune Klok Gudiksen*

S1140 **Learning Architectural Design. Material and Immaterial Aspects.**
Gerlinde Verhaeghe

S1154 **Making Sense: Harnessing Communication through Prototyping**
Giovanni Innella, Paul A. Rodgers

S1167 **Material Tinkering. An inspirational approach for experiential learning and envisioning in product design education** *Stefano Parisi, Valentina Rognoli, Marieke Sonneveld*

S1185 **Materials & Manufacturing Methods selection in product design: Experiences in undergraduate programs** *Aline Souza, Rita Almendra, Lia Krucken*

S1197 **On Context, Concepts and Research: An Approach in Basic Design**
Dilek Akbulut, Hatice Kesdi

S1212 **On The Teachers Role in Interactive Prototyping**
Jussi Mikkonen

S1224 **PBL 2.0. Interdisciplinary, multicultural transformative sustainable education for design students** *Elad Persov, Roshni Udyavar Yehuda, Ruti Kantor, Barak Pelman*

S1241 **Preparing design students for the market: an initial investigation on the required knowledge and skills for graphic designers in Brazil** *Paulo Roberto Nicoletti Dziobczenski, Anamaria Amaral Rezende Galeotti*

S1250 **Reconstructing the critique. Using inclusive formative feedback in face-to-face and online communities of practice to improve knowledge acquisition in design education**
Lucia Miceli, Lynette Zeeng

S1260 **Reflexive Practices for the Future of Design Education: An Exercise in Ethno-Empathy**
Manu J. Brueggemann, Angelika Strohmayer, Matthew Marshall, Nataly Birbeck, Vanessa Thomas

S1270 **Rethinking the Design Studio-Centered Architectural Education. A Case Study at Schools of Architecture in Turkey** *Burkay Pasin*

S1285 **Rethinking the education of retail design. What are the competences a retail designer needs in this fast evolving discipline?** *Katelijn Quartier, Stephanie Claes, Jan Vanrie*

S1293 **Semiotics in Design Education. Semiotics by Design** *Michela Deni, Salvatore Zingale*

S1304 **Service Design pedagogy and effective student engagement: Generative Tools and Methods** *Hena Ali, Silvia Grimaldi, Monica Biagioli*

S1323 **'Sketching' the new designers - going wide, going deep and doing it together** *Rita Assoreira Almendra, Gonçalo Falcão*

S1336 **Systemic Design, from the content to the structure of education: new educational model.** *Chiara Battistoni, Silvia Barbero*

S1355 **Systemic Food Design.it A website that narrates food supply chains from a systemic perspective** *Franco Fassio*

S1367 **The Anatomy of a Multi-Sensory Design Course: Happy Sound Object** *Yasemin Soylu, Berrak Karaca Şalgamcıoğlu, Pelin Efilti, Oki Kasajim*

S1380 **The design brief: inquiry into the starting point in a learning journey** *Noemi Sadowska, Dominic Laffy*

S1390 **The Digital Corbeled Wall. A Pedagogical Approach to Digital Infrastructure and Traditional Craft** *James Stevens, Ayodh Kamath, Komal Sharma*

S1405 **The end of the "briefing" and "the client" in graphic design.** *Gonçalo Falcão, Rita Almendra*

S1415 **The Reflection of Experiential Knowledge Into Professional Practice: Case of Industrial Design Education** *Enver Tatlisu, Çiğdem Kaya*

S1430 **The street as teaching space. A case study** *Paul Woodruffe, Mandy Patmore*

S1448 **Theoretical studies and practical tools for a systemic design educational paradigm. Applications of Systems Thinking principles to design education** *Laura Dominici*

S1459 **Towards a University Design School. Restoring the value of tacit knowledge through assessment** *Lynne Whelan, Carmel Maher, Colin Deevy*

S1471 **Using Design Methods to Improve Design Quality: Verbalizers vs Visualizers** *Younjoon Lee, Jaewoo Joo*

S1485 **Vulnerable children as change-agents within their communities: an educational methodology co-designed in Namibia** *Valentina Salvi*

S1503 **Wearable Words: A case study applying Jewellery theory and practice to the education of Fine Art, Textiles Innovation and Design, Graphic Communication and Illustration students** *Roberta Bernabei*

S1511 **What students say about their work and what it says about their work. Toward the development of rhetorical practice in the educational design studio** *Myra Thiessen, Veronika Kelly*

S1521 **What's Next in Design Education? Transforming role of a designer and its implications in preparing youth for an ambiguous and volatile future** *Ramneek Kaur Majithia*

S1530 **Why a Logbook? A backpack journey as a metaphor for product design education** *Violeta Clemente , Katja Tschimmel , Rui Vieira*

S1543 **World design. Educational approach for a new experience of sharing.** *Maria Antonietta Sbordone, Rosanna Veneziano*

DESIGN FOR NEXT ENVIRONMENT

S1558 **A second life for Contemporary Ruins. Temporary Adaptive Reuse strategies of Interior Design to reinterpret vacant spaces** *Barbara Camocini, Oxana Nosova*

S1566 **An Integral Design Framework —designing a global village**
Fenja Sepers

S1580 **Architecture for Regenerating Living Ecosystems: Designing a clay module for a vaulted dome structure** *Miruna Sladescu, Caitilin de Bérigny, Glen Hill*

S1596 **Bioplastics made from upcycled food waste. Prospects for their use in the field of design**
Cecilia Cecchini

S1611 **Circular Material Library. An Innovative Tool to Design Circular Economy**
Maarit Virtanen, Kati Manskinen, Sauli Eerola

S1620 **Circular Product Design. A Multiple Loops Life Cycle Design Approach for the Circular Economy** *Ana Mestre, Tim Cooper*

S1636 **Climate Change. Design Teaching for a New Reality**
Paul Micklethwaite, Robert Knifton

S1651 **Creating 21st Century Global Citizens. A design-led systems approach to transformative secondary education for sustainability** *Nikolas Winter-Simat, Natalie Wright, Jaz Hee-jeong Choi*

S1662 **Creating a Tool for Measuring the Social Value of Design**
Jea Hoo Naa, Youngok Choi, Andrew Walters, Busayawan Lam, Stephen Green

S1673 **Data Visualization Collection. How graphical representation can inspect and communicate sustainability through Systemic Design** *Barbara Stabellini, Chiara L. Remondino, Paolo Tamborrini*

S1682 **DEMOCRATIC CARDBOARD. Materials and design for a sustainable society**
Davide Turrini

S1692 **Design for Leftovers. From Food Waste to Social Responsibility**
Marco Bozzola, Doriana Dal Palù, Claudia De Giorgi

S1705 **Design for social sustainability. A reflection on the role of the physical realm in facilitating community co-design.** *Mirian Calvo, Annalinda De Rosa*

S1725 **Design Process and Sustainability. Method and Tools**
Marco Marseglia

S1738 **Designing material interaction to promote water saving. An exploration of sensory language** *Sara Bergamaschi, Lucia Rampino*

S1751 **Designing on the Spot: Learning from the Social Design Projects in Gökçeada/Imbros Island** *Alayça Erözçelik, Burak Taşdizen*

S1765 **Energy Performance Development of Non-regulated Retrofit Mass Housing Estates in Northern Cyprus** *Bertug Ozarisoy, Hasim Altan*

S1782 **Envisioning the future of public lighting with citizens for upcoming technologies**
Olli Heiskanen, Karthikeya Acharya

S1794 **From Science to Design: the Design4Materials virtuous cycle**
Rossana Carullo, Cecilia Cecchini, Marinella Ferrara, Carla Langella, Sabrina Lucibello

S1807 **GreenTeam. A new educative approach to sustainable design**
Andrea Di Salvo, Silvia Barbero, Andrea Gaiardo, Giada Rivella

S1817 **'I Believe in That Version of the Future'. Cli-Fi and Design Fictions as Dialogical Frameworks for Expert Engagements** *Lizette Reitsma, Stina Wessman, Elin Önnevall*

S1827 **Information design as a tool for promoting renewable energy**
Susanna Vanhamäki, Antti Heinonen, Kati Manskinen, Mirja Kälviäinen

S1836 **Make the environment the (Next) Economy**
Vanessa Monna

S1852 **Material Resignification in the Amazon. A way to construct sustainability scenarios**
Fernanda Sarmento, Monica Moura

S1869 **Pocket Park: Product Urban design**
Francesco Armato

S1879 **REPEAT – Textile Design for PV Modules! Design-driven Strategies for Photovoltaic Modules** *Tina Moor, Brigitt Egloff, Tina Tomovic, Stephen Wittkopf*

S1894 **Resilient Design: Mitigating Trepidation About Environmental Disasters**
Tonya Sweet, Catherine Caudwell

S1904 **Rethinking Water: A CAAS (City As A Spaceship) design approach**
Susan Fairburn, Barbara Imhof, Susmita Mohanty

S1916 **Shifting Conversations for Sustainability Transitions Using Participatory Design Visioning**
A. İdil Gaziulusoy, Chris Ryan

S1927 **Space4Inspiration: Survival Lab. Designing Countermeasures for Natural Disasters**
Annalisa Dominoni , Benedetto Quaquaro, Susan Fairburn

S1938 **Sustainable Design Futures: An open design vision for the circular economy in fashion and textiles** *Paul Smith, Jen Baille, Lynn-Sayers McHattie*

S1948 **Sustainable Design: Circular Economy in Fashion and Textiles**
Debbie Moorhouse, Danielle Moorhouse,

S1960 **The Speedcycle: a design-led framework for fast and slow circular fashion lifecycles**
Kate Goldsworthy

S1971 **VEG-HIVE. An easy to grow veg-kit for urban farmers**
Erminia D'Itria, Loredana Di Lucchio

DESIGN FOR NEXT HEALTH

S1978 **A Healthcare Wearable for Chronic Pain Management. Design of a Smart Glove for Rheumatoid Arthritis** *Gozde Goncu-Berk, Nese Topcuoglu*

S1989 **A Multidisciplinary inspection of Dental Photography: What Do Dentist Think and What Can Designer Do?** *Yener Altiparmakogullari, Muhsin Cifter, Abdusselam Selami Cifter*

S1998 **A Review on Future Directions in Hospital Spatial Designs with a Focus on Patient Experience** *Abdusselam Selami Cifter, Muhsin Cifter*

S2010 **Co-designing co-design. Shifting the culture of practice in healthcare**
Paul Chamberlain, Rebecca Partridge

S2022 **Design and Disability. Developing New Opportunities for the Design Curriculum**
Emma Gieben-Gamal, Sónia Matos

S2033 **Design and Usability of the Next Medical Devices for the Home Care**
Francesca Tosi, Alessandra Rinaldi

S2044 **Design Experiments. Identifying areas for intervention and designing medical technology for adolescents and young adults with type 1 diabetes** *Gillian M. McCarthy, Edgar R. Rodríguez Ramírez, Brian J. Robinson*

S2057 **Design facilitators' journeys through the jungle of Co- in healthcare**
Remko van der Lugt, Tanja van der Laan

S2068 **DESIGN FOR DUCHENNE. Guidelines for dwellings' construction or renovation for Muscular Dystrophy-Affected Families** *Michele Marchi, Giuseppe Mincolelli*

S2078 **Design for Dysphagia: a new hardware-and-software mobile system to monitor patients' swallowing** *Niccolò Casiddu, Claudia Porfirione*

S2090 **Design for the ambient assisted living**
Giuseppe Losco, Andrea Lupacchini, Luca Bradini, Davide Paciotti

S2109 **Design of non-speech sounds for human interaction. A conjunction between industrial design and psychology** *Eduardo Tapia Olmos*

S2120 **Design probes and toolkits for healthcare: Identifying information needs in African communities through service design** *Ralitsa D. Debrah, Retha de la Harpe, Mugendi K. M'Rithaa*

S2135 **Design research for the development of a Medical Emergency Ambulance. Design as a symbolic qualifier in the design of complex systems/products** *Augusto de Sousa Coelho, Vasco Branco*

S2158 **Designing Care. How Design can improve medical products for a therapeutic wellbeing**
Angela Giambattista

S2168 **Designing for Aesthetic Disruption: Altering Mental Models in Social Systems through Designerly Practices** *Josina Vink, Katarina Wetter-Edman, Manuela Aguirre*

S2178 **Designing for an ageing society: products and services**
Silvia Pericu

S2190 **Designing Industrial Design in the Highly Regulated Medical Device Development Process. Defining our valuable contribution towards usability** *MaryBeth Privitera*

S2207 **Designing Interactive Music Systems with and for People with Dementia**
Alexander Müller-Rakow, Rahel Flechtner

S2215 **Designing Schools for Students on the Spectrum** *Ulrike Altenmüller-Lewis*

S2230 **Designing Therapeutic Support for the People with Alzheimer's disease. A designerly way of Investigation** *Beril Imamogullari, Alessandro Biamonti*

S2238 **Designing with Dignity: Social determinants of health and design research**
Diana Nicholas, Kiera Townsend, Yvonne Michael

S2247 **Discovering Service Variations through Service Prototyping**
Vanessa Rodrigues, Stefan Holmlid

S2258 **Emerging Trends and the Way Forward in Design in Healthcare: An Expert's Perspective**
Emmanuel Tsekleves, Rachel Cooper

S2273 **Enhancing co-responsibility for patient engagement**
Ineke Neutelings, Pierre Levy, Tom Djajadiningrat, Caroline Hummels

S2284 **Environment as non pharmacological intervention in the care of Alzheimer's disease** *Silvia Maria Gramegna, Alessandro Biamonti*

S2293 **Health Co-Creation in Social Innovation: Design Service for Health-Empowered Society in China** *Liang Yin, Davide Fassi, Hang Cheng, Han Han, Shushu He*

S2304 **Health Design: Mapping current situations, envisioning next steps**
Guillermina Noël

S2315 **How can constraint-induced movement therapy for stroke patients be incorporated into the design of a tangible interface?The case study of the 'Biggest Hit'**
Mailin Lemke, Edgar Rodríguez Ramírez, Brian Robinson

S2336 **Imagined futures: designing future environments for the care of older people**
Claire Craig

S2348 **Improving the Pelvic Exam Experience: A Human-Centered Design Study**
Gina A Taylor, Deana McDonagh, Michael J Hansen

S2363 **Improving the Visualisation of Renal Blood Test Results to Enhance Patient – Clinician Communication** *Adrian Gradinar, Jeremy Davenport, Heather Hill, Paul Coulton*

S2375 **Incremental and Radical Innovation: Design in Robotics for Autism. Teo and Riby robots. Evolutionary Development** *Maximiliano Romero, Andrea Bonarini, Andrea Brivio, Ksenia Rogacheva*

S2389 **Informing hospital design through research on patient experience** *Margo Annemans, Liesbeth Stam, Jorgos Coenen, Ann Heylighen*

S2397 **Limited use only. How can the design of an everyday object help chronic stroke patients to overcome the learned nonuse of the upper limb?** *Mailin Lemke, Edgar Rodríguez Ramírez, Brian Robinson*

S2418 **Multisensory design of pocket gardens for reducing stress and improving well-being, performance and satisfaction** *Noemi Bitterman, Ella Simonov*

S2426 **Participant Observation in Cognitive Gameplay as a Rehabilitation Tool for Living Alone Elderly with Dementia in Hong Kong: A Pilot Study** *Alex Pui-yuk King, Kin Wai Michael Siu*

S2439 **Persuasive Technology as key to increase Working Health Condition. The Case study of a Wearable System to prevent Respiratory Disease** *Venere Ferraro, Mila Stepanivic, Silvia Ferraris*

S2451 **SAM - Simulation Airways Models** *Elisabetta Cianfanelli, Lorenzo Corbetta, Gabriele Goretti, Lorenzo Pelosini, Maria Luisa Malpelo*

S2463 **Sense and movement. Design of a system for sensorimotor rehabilitation after stroke.** *Francesca Toso*

S2473 **Systemic Design for Sustainable Healthcare** *Silvia Barbero, Agnese Pallaro*

S2486 **Systemic innovation in sustainable design of medical devices** *Silvia Barbero, Amina Pereno, Paolo Tamborrini*

S2498 **The Effectiveness of Environmental Design for Physical Activities Promotion: Review** *Aline Gonzalez-Moreno, Aldo Valencia-Hernandez, Omar Valencia-Hernandez*

S2524 **The fuzzy front-end and the forgotten back-end: User involvement in later development phases** *Frida Almqvist*

S2534 **User-Designed Dementia Care Pathways. A disruptive approach to mapping dementia support services** *Daniel Carey, Andy Tennant, Paul Rodgers, Katie Dodd*

S2551 **Wayfinding for health seeking: Exploring how hospital wayfinding can employ communication design to improve the outpatient experience** *Eden Jayne Short, Stephen Reay, Peter Gilderdale*

S2569 **Well Connected. What does design offer in the complexity of blood donation management** *Tine Thorup, Jen Ballie, Marjan Angoshtari*

S2580 **Will smart homes improve our lives? A design perspective towards effective wellbeing at home** *Margherita Pillan, Sara Colombo*

DESIGN FOR NEXT INDUSTRY

S2592 **A Design perspective for IoT products. A case study of the Design of a Smart Product and a Smart Company following a crowdfunding campaign.** *Ilaria Vitali, Venanzio Arquilla, Umberto Tolino*

S2605 **Changing roles. Role theoretical approach to customer involvement in industrial service development** *Sanna Peltonen*

S2616 **Design Absorption and Learning Processes: a study on designers' perceptions about companies.** *Ivna Ravanello, Fabiane Wolff, Andréa Capra*

Abstract: Big data are totally changing the business rules, the society, as well as the perception of ourself. The need of a big data oriented culture is becoming essential for everything that has an informative assets. Furthermore, technological innovation offers products and features unique that can help to convey values and meanings, for the purpose of communication based on increasingly strong interaction between people. In a world where everything is consumed in a short time, it is important to turn information as visual as possible, making simple what is complex. The visualization becomes a medium for increasing cognitive perception of the beholder, easing reasoning and storing of the information represented, showing patterns and relationships, known or not, maybe not easily visible without the aid of a visual representation of information.

Keywords: sustainability, systemic design, data visualization, complexity

1. Introduction

We are living in an era of exponential increase in data production, collection and usage in different sector and in everyday life moments; for this reason the ability to collect, understand, communicate and make sense of information is going to be a very important skill. In terms of sustainability, data produced by environment, both infrastructures and individuals become tools for reading the society, quantifying its sustainable and unsustainable aspects; the study and the analysis of such data is fundamental to better understand what may be the future action strategies in order to improve environmental, economic and social sustainability.

The growing interconnection due to the digitalization of information and relations, as well as the exponential spread of data generated by things, people and organizations, represent a challenge and an opportunity to design new tools suitable to complex and changing environment in which we live. Therefore, it is essential to understand how it is possible to extract the most value from information, emphasizing the communicative potential contained in them (Cukier, 2013).

In a world where everything is consumed in a short time, it is important to turn information as visual as possible, making simple what is complex. Data visualization becomes a fundamental medium to explore phenomena, encouraging thinking, information memorization and interpretation; in other words make complex phenomena accessible through visual tool. The transformation from data to information, anyway, is not that simple, but is a continuous improvement path where data are collected, categorized and contextualized in a specific ecosystem.

Because of the importance of this transformation, the discipline and the role of the design become essential. Nevertheless, today many works that can be included within the topic of visualization of the data is often the result of the lack of design or of a design that does not take into account an overview. For this topic, design is often considered a surplus, but the discipline should find space right here, by filling this gap, positioning itself at the beginning of within the design whole process, not just at the end, so as to be able to offer a complete design in all its stages, and not a simple and common add-on.

Specifically, the purpose of our research is find positioning in the beginning of the decision procedure, offering an important contribution in the selection of the correct type of visualization graphics, adapting and shaping to better define guidelines to analyze and broadcast informations with a sustainable point of view.

In order to achieve the best result in term of comprehension and communication, it becomes essential the creation of a multidisciplinary team; indeed, data visualization cannot simply be defined as the representation of information in visual form, but it is a complex multidisciplinary field (Card, 1999), ranging from data mining to visual art, from psychology of perception to graphic and systemic design.

2. Collection

The use of charts, graphs, maps, diagrams, and tables is not new; this kind of representation accompanied us in the course of human evolution in dealing with the history and the socio-cultural contexts, the spaces and the organization of our knowledge based on models more and more suited to our way of life and the way in which we feed of information.

2.1 Environment as a context

Always, the greatest experimentations and monitoring has been conducted into the environment. For this reasons it becomes of fundamental importance to keep track of all that surround us and being able to understand data that environment offers.

This scenario allows to assume that environment is the context. The environment, in fact, produces data from space to people, both analogic and digital as well as the intersection of them and their correlation. This data become raw material, on one hand enabling a continuous transformation, and on the other hand encouraging always more new projects and visions, shared only if make visible.

Always, the weather conditions monitoring interest people, scientists, amateurs and national or international institutes. The meteorological data, be they collected by professionals, citizens or sensors and other technologies, has been, and currently is, fundamental in an attempt to forecast meteo and global climate changes. The sailor observation has been of vital importance to develop the first ocean current and wind maps. It is possible to see a particular and interesting series of data in the captains on board diaries of the East India Company ship. In 1709, the Rochester ship sailed away from Great Britain to China and its captain kept a detailed diary with ship sketch, wild animal

Downloaded by [Politecnico di Torino] at 02:33 06 September 2017

drawings and particular locations pictures, recording also all the information about position, path and meteo forecast. Today, the availability of huge amount of data, allows scientists to complete this work. Their images aren't only static maps, but are able to capture the dynamic nature of our global system. For example, the NASA visualization, shows oceanic currents thought satellite data collected between 2005 July and 2007 December, offering a dynamic overview, with significance and impact.

Also the healthcare field is strongly interested and involved in the data visualization; in fact, the graphic representation of the information is integral part for the healthcare improvement and the society well-being. History shows how sometimes the representation of harvested data could help to find causes and therapy diseases, as well as the tracking of infection rate and geographic distribution allow to monitor the epidemics diffusion or the identification of the local environmental factor that contribute to it. The most known and influential visualization in this topic is made by Dr. John Snow who tracked Soho deaths due to cholera in 1853 highlighting in a ghost map the water pumps of the area and crossing these data with the close deaths; in this way he could prove how epidemics didn't spread out by Thames, but by the water contaminated with human waste, thus strongly linking the healthcare question to the environmental one. Today, the healthcare data mapping continues to be very important, especially if connected with other demographic dataset: significative contribution in this regard is the work by the UK Chief Medical Officer that every year publishes an annual report in which there are mapped a huge number of mortality and morbidity, with the goal of offer a clear and objective overview on the national clinic situation.

Maps are a topic widely linked to mobility research, not only for what that concern path, travel indication and signs. The analysis and the visualization of tracked data by individuals, as by companies, can offer a particular reading of the around society. Since 1980, curious is the use of data from the UPS delivery company, which, through the initiative called ORION (On-Road Integrated Optimization and Navigation), started to track its vehicles, monitoring speed, direction, braking, and drive train performance. These data are not only used to monitor daily performance, but to redesign the route structures: this approach allows to reorganize the delivery path optimizing fuel consumption and, consequently, environmental carbon emission.

In the end, if we consider environment as the context, we can not refer to the energy issue, which is today one of the hottest topic, including consumption, discovery and implementation. The growing availability of energy data allows people to determines how they use them defining what is their impact on the environment, also linking these information with other dataset as public transport, technology, production.

2.2 Data visualization collection

In order to better collect, visualize and communicate data, for example as above mentioned, but not only limited at it, the literature reveals a lot of types of graphical representation from specific sectors (such as finance, economics, science or meteorology), but in terms of innovation and experimentation, all those forms can be applied in areas for which they were not designed, offering the expansion of the domains and purposes to which these practices are applied.

There are a lot of research which try to find the best way to classify graphics. One of the first characteristic of the existing taxonomies of graphs and images is the difference between functional or structural. Functional taxonomies focus on the intended use and purpose of the graphic material. In contrast, structural ones are derived from exemplar learning and focus on the form of the image placing more emphasis on emotions, rather than its content. In general this tendency arise from the distinction between the different experts's background, the firsts typically focused on statistics, computer science and engineering, while the second ones much more into graphic design and arts.

One of the most common and known example of functional classifications can be found in Edward Tufte. He identify four specific category in which classify graphics: the geographic representation through maps, the time-series, the graphic representation of events and phenomena which develop in space-time and the visualization of relations. (Tufte, 1983)

Also Heer, Bostock and Ogievetesky have put the emphasis on functionality in 2012; they proposed an articulated classification of graphics focusing on the experience of our times, and then paying attention on big data. Specifically, they identified four categories: time series, statistical distributions, maps, hierarchies and networks. (Heer, Bostock e Ogievetesky, 2013).

Different from a functional classification, Lohse et al. (Lohse, 1990; Lohse, 1994) classify visual representations using meaning and similarity between them. They identified six basic categories of visual representations: graphs, tables & time charts, maps & cartograms, diagram, networks, and icons.

In addition to taxonomies, there are a lot of catalog and table that collect the visualization methods. One of the most known book that collected and explain the use of each single type of representation is the manual of Harris (Harris, 1996). Another example is the Periodic Table of Visualization Methods (Lengler, 2007). This kind of classification aims to be less academic and draws on fields such as chemistry for his famous periodic table of elements. The periodic table is an interactive and prototypical example of Ben Shneiderman's visualization mantra of Overview first, zoom and filter, then details on demand. (Shneiderman, 1996). The visualization methods are categorized in data visualization, information visualization, concept visualization, metaphor visualization, strategy visualization and compound visualization. All graphics are then specified according task and interaction (overview, detail, overview and detail), the cognitive processes (convergent thinking, divergent thinking), and the represented information (structure, process).

Starting from the fundamental taxonomy defined by Tufte and the most common basic classification by Lohse et al., we collected 96 visualization graphics trying to offer a comprehensive collection. As it is possible to see in figure 1, there are many type of graphics, some of these unknown to many people, due to their specific field of use.

Downloaded by [Politecnico di Torino] at 02:33 06 September 2017

Figure 1. Collection of the types of representation and their functions.

Except for particular type of representations, the other ones can be used for different kind of data; nevertheless, it remains essential the right choice of the graphics in order to achieve the graphical excellence which consists of complex ideas communicated with clarity, precision, and efficiency. (Tufte, 1983; Cairo, 2013).

However, the importance of communication and the message that visualization itself should convey bring attention to move on the functions that these representations can perform. In order to allow this process, we identified twelve function to which a visualization have to perform, and we tried to relate each chart to each function defined: text analysis, comparison, timeline, distribution, flows, operation/process, hierarchy, location, probability/choice, proportion, range, relationship.

It's important to specify that each representation can be generally used to perform many functions, both in different projects and at simultaneously in an only-one visualization. An example can be the word cloud, a representation in which words that appear most frequently are larger and words that appear less frequently smaller, this is normally used for the text analysis, but at the same time it can highlight concepts by using dimension of the words, or put them in relation by space disposition.

3. Context and relations

Nevertheless, the identification of the right representation is only a part of the process. Data on their own do not say anything, they should be placed in context, correlated with each other or with other datasets to identify distributions, sizes and correlations; they have to be sorted and aggregated according to designed criteria.

To do so it becomes essential the analysis of the initial data and their inclusion in the context, properly related to each other and/or with other datasets to identify distributions, sizes and correlations, sorted and aggregated according to criteria to the search.

Downloaded by [Politecnico di Torino] at 02:33 06 September 2017

As Tufte wrote, context is essential to reply to the question “Compared to what?”. In fact, graphics must not quote data out of context and context is essential for graphical integrity. (Tufte, 1983)

Speaking of which, Wurman suggest that one of the main purpose of information representation is to help users avoid “the black hole between data and knowledge”; thanks to the relation with the context, unstructured information (reality and complexity), can be encoded in structured information and then knowledge and insights for a more conscious data driven decision making process, according to the DYKW hierarchies model (Data, Information, Knowledge, Wisdom).

Take into account context means also analyze users interested to the visualization, in order to offer a representation with a complexity level suitable to them and to answer the question “Do you know what it all means?”. In fact, basically there are two factors that influence the process of communication between the designer and the reference users: how the visualization used is well adapted to encode information on the nature of the story that you want to tell, and the background and knowledge of the reader about the argument represented. (Cairo, 2013).

Thus, information visualization is used to clarify and simplify information. It enables exploration of complex data, and can be used as a tool to persuade and convince observers of an idea by making information visible, highlighting the causes and effects of specific choices, comparing the different values and situations, showing the flow of a system and how it changes, analyzing the relations, distributing chaotic data into an ordered structure (Cairo, 2013; Shneiderman, 1996).

The design model used, known as Systemic Design (Bistagnino, 2011), pays attention to the organization, optimization and understanding of every single factor at play focusing at first on user requirements, then highlighting the best conditions and the most interesting facets to work on, while keeping an eye on their mutual relations. The focus moves from the simple sum of many elements towards a better understanding of the links between them and their strength, trying to balance functionality and aesthetics.

4. The role of design

To many people, information graphics are the images used in presentations throughout formal meetings or the graphs used in reports or newspaper articles. Many are used for these purposes; however, for each chart, graph, map, diagram, or table used in a presentation, there are others that are used for what that are called operational purposes. Representations for operational purposes are used by millions of people everyday for improving their efficiency and effectiveness, improving quality, solving problems, planning, teaching, training, monitoring processes, studying the geographic distribution of data, looking for trends and relationships, reviewing the status of projects, developing ideas, writing reports, analyzing census data, studying sales results, and tracking home finances. (Harris, 1996)

However, because of its historical roots in scientific reasoning, in academic research advanced information visualizations is often interpreted and characterized as scientific tools; the focus is therefore directed only to the functional requirements, not paying any attention to the aspects of user experience and graphic aesthetic.

In recent years, given the accessibility to the public of a great number of data sources as open data and environmental report, and the impact of that argument on the communication, the number of designers involved has increased, heavily impacting on the data visualization features. Information visualization is becoming more than a set of scientific tools to understand large data sets, but it is

Downloaded by [Politecnico di Torino] at 02:33 06 September 2017

emerging as a medium in its own right, with a wide range of expressive potential and its goal is to transform data into information and information into insight (Fiorina, 2004).

As in most other design-related fields, information visualization seeks to achieve a balance between the requirements of utility, soundness and attractiveness. Utility corresponds to the classic notions of functionality, usability, usefulness and other quantitative performance measures; these aspects generally define the effectiveness and the efficiency of the visualization. Soundness is concerned with reliability and robustness. Attractiveness refers to the aesthetics aspect: the appeal or beauty of a given solution; aesthetics does not limit itself to the visual form, but also includes aspects such as originality, innovation and user experience. (Moere, 2011)

If we take into account this requirements, the relation between design and information visualization become clear, and also become clear the importance of the design discipline during all the process: in fact, it is not an activity that can be added later.

But we want to underline the importance of the key background focused on sustainability. The goal of any data visualization design is rethink constantly both the workflow and the language in order to increase knowledge and understanding to enabling always more conscious behavior. It follows the importance of a network of actors involved in the project; networking is, in fact, considered essential for the growth of an ecosystem because of cooperation and inclusion processes help optimally managing the project and the goal pursuit.

5. Conclusions

Today, an increasing number of organization and corporation, as well as single users or public administrations, are realizing that volume, velocity and variety of data require always more new application. More than technology, though, they should adopt a different mind-set based upon data discovery and exploration; the visualization itself should be seen as a technology (Cairo, 2013) as an extension of ourselves. A good project has two main goals: it present informations and it allows user to explore and discover them; in other words data visualization is a tool for the designer to communicate with users and an instrument for users to analyze the reality presented.

In this way the role of the data visualization is to activate the attention and analysis process and generate order before people's brain try to do it. Thus, the visualization becomes a medium for increasing cognitive perception of the beholder, easing reasoning and storing of the information represented, showing patterns and relationships, known or not, maybe not easily visible without the aid of a visual representation of information.

On the role of the design is important to remember that the function constraints the form and that the graphical elegance is often found in simplicity of design and complexity of data; graphics should not simplify message. They should clarify them, highlight trend, discover pattern and show hidden reality.

The postmodern personality is fluid, complex and dynamic, and the needs of the people are always new; the different identities have different approaches to technology, communication and information. For these reasons, it becomes highly interesting to give the possibility of obtaining results by ensuring the personalization experience, with the aim of satisfying the different needs and driving the user to repeat his behavior.

In this context, information visualization can be a valuable tool to improve communication, to offer a higher level of information, but even to allow users a personalized path. All this can be applied to different contexts coming to assume the role of cultural analysis tool for discovering and

understanding data, decoding the complexity of contemporary society and abilitate always more new sustainable and innovative practices.

About the Authors:

Barbara Stabellini is an ecodesigner interested in data visualization and innovation design, with a particular attention of the sustainability point of view. She is a PhD Candidate at Politecnico di Torino and co-founder of the Innovation Design Lab.

Chiara L. Remondino holds a MS in Ecodesign and is currently pursuing her PhD at the Politecnico di Torino. Her research is focused on big data, data visualization and sustainability. She obtained a Lagrange ISI Foundation fellowship on interaction in complex system. She co-founded the Innovation Design Lab.

Paolo Tamborrini is architect and Associate Professor of Design. Head of the Design School at Politecnico di Torino (Italy); founder and scientific coordinator of the Systemic Innovation Design Network (SyInDe). Editor about innovation design, eco-design and sustainability for the major design magazines.
