## ERRATA

The article “Effect of Canal Length and Curvature on Working Length Alteration with WaveOne Reciprocating Files” by Elio Berutti, Giorgio Chian-dussi, Davide Salvatore Paolino, Nicola Scotti, Giuseppe Cantatore, Arnaldo Castellucci and Damiano Pasqualini (*J Endod* 37[12]:1687–90; 2011] should have included this statement in the author information section: “Giuseppe Cantatore, Arnaldo Castellucci, and Elio Berutti declare that they have financial involvement (patent licensing arrangements) with Dentsply Maillefer with direct financial interest in the materials discussed in this article.” In addition, Dentsply provided some of the instruments used in this study.” The authors regret this omission.

In the Discussion section of the article “Antibiotic Resistance in Primary and Persistent Endodontic Infections” (*J Endod* 2011;37[10]: 1337–44), references were made to work previously performed by Rossi-Fedele et al (references 23 and 24 in the article). The authors wish to correct the language used to refer to that work in the following manner. The statement, “*TetM* has been identified in tetracycline-resistance *Enterococcus faecalis* found in endodontic infections (23, 24)” should be “*TetM* has been identified in tetracycline-resistance bacteria found in endodontic infections (23, 24).” Also, the statement, “These studies found that 8 of 15 tetracycline-resistance bacteria isolated possessed the *tetM* gene and were resistant to tetracycline irrigation in an *in vitro* tooth model” should be “These studies found that tetracycline-resistance bacteria were resistant to tetracycline irrigation in an *in vitro* tooth model.” The authors regret any confusion in describing the work done in these studies.
