CONTENTS

36 About the conference
Loredana Di Lucchio, Lorenzo
Imbesi

49 EXHIBITIONS

51 ARTIFICIAL | City of Experiences
George Brown College, Canada

54 LANGUAGES | Post collaboration
as a form of counter-culture: The
birth of new languages
University of Johannesburg,
South Africa

57 LIFE | Design for social problems
in Mexico: living with disabilities
Autonomous Metropolitan
University, Azcapotzalco, Mexico

60 MAKING | New Textile
Topologies: Experiments at the
intersection of surface, textile
and form
The Swedish School of Textiles,
Sweden

63 MULTIPLICITY | Self-Acceptance
to Self-Indulgence
Pearl Academy, India

66 NEW NORMAL | Expedition 2
Degrees
Zurich University of the Arts

69 PROXIMITY | Newcomers: Design
for Immigrants
Pratt Institute's School of Design,
USA

72 RESILIENCE | Designing for
Resilience: Creating new
possibilities for industrial cities
University of Monterrey, Mexico

75 REVOLUTION | UFØ Drift: In
Search of Practice
ArtEZ University of the Arts
Arnhem, Netherlands

78 THINKING | Design and
awareness: user meeting
ESDAP Catalunya, Spain

81 DESIGN CULTURE (OF) ARTIFICIAL

83 A participated parametric design
experience on humanoid robotics
Francesco Burlando, Xavier
Ferrari Tumay, Annapaola Vacanti

99 A systemic vision for the common
good : |C|A|S|E| Goods Mobility
in the fourth industrial revolution
Veneranda Carrino, Federica
Spera

CONTENTS

117	Activist Activated: Efficacies of AR Political Poster Design Sarah Edmands Martin	199	Consensual (Design) Fictions: co-creating iterative use cases to define technology conceptualization David Hernández Falagán, Andreu Belsunces Gonçalves, Kevin Koidl
130	Art, Design, and Mathematics: Software programming as artifice in the creative process Carlos de Oliveira Junior, Eduardo Ariel de Souza Teixeira	215	Design of robotic for superhuman tasks Fabrizio Formati
142	Artificial Creativity – Hybridizing the Artificial and the Human. Yael Eylat Van Essen	227	Design, space management and work tools: enhancing human work in transition to Industry 4.0 Luca Casarotto, Pietro Costa, Enrica Cunico
156	Artificial Intelligence is a Character? Exploring design scenarios to build interface behaviours Andrea Di Salvo, Andrea Arcoraci	237	Designers' skills for Social Robotics Maximiliano Romero, Giovanni Borga, Rohan Sashindran Vangal, Francesco Baldassarra
168	Becoming Janus: The Subversive Potential of Face Recognition Technologies Romi Mikulinsky	251	Designing for the future by understanding evolving culture based on advancing technology and the changing behaviours that accompany it. Nayna Yadav
181	Between digital and physical. Envisioning and prototyping smart material systems and artifacts from data-informed scenarios. Stefano Parisi, Patrizia Bolzan, Mila Stepanovic, Laura Varisco, Ilaria Mariani	264	Designing Somatic Play for Digital Natives through a Body-centric Design Process Seçil Uğur Yavuz, Kristi Kuusk, Michaela Honauer

CONTENTS

279	Designing unpredictable futures. An anthropological perspective on the algorithmical prediction of human behaviour Giovanna Santanera, Roberta Raffaetà	360	From the evaluation of acceptability to design of an assistive robot for elderly Francesca Tosi, Mattia Pistolesi, Claudia Becchimanzi
290	Digital Creativity Tools Framework Marita Canina, Carmen Bruno	376	Future heritage and heritage futures. A design perspective on the activation of Digital cultural heritage stored in archives Margherita Tufarelli
304	Digital tools that support students to reflect on their design competency growth paths John Fass, Job Rutgers	386	Going beyond the problem of privacy: individual and social impacts of the use of personal information in connected services Laura Varisco
316	Domestic AI and Emotional Involvement. Design Perspectives Mauro Ceconello, Martina Sciannamé, Davide Spallazzo	400	Human and Artificial Intelligence for the Cultural Reform of Design Elena Laudante, Mario Buono
328	Empowered by Code, to act in real word Alfredo Calosci	412	Human Sensibility, Robotic Craft: Toward Autonomous Stonework Tom Shaked, Karen Lee Bar-Sinai, Aaron Sprecher
339	Exploring Digital Inequalities: How Welfare States are disappearing behind an AI Paola Pierri	423	Interface takes command. Educational environments, tools and practices to face the new normal. Alessio Caccamo
349	From Decoration to Functionality — Research on smart accessories design in the Internet era Qingman Wu	437	Intelligent Voice Assistants: A Review of User Experience Issues and Design Challenges Lucia Rampino, Sara Colombo

CONTENTS

449	Research on Gender Differences of Adult Head Shape in China Renke He, Wenxiu Yang, Wanshan Li, Haining Wang	537	The Perceptual and Dialogical Form of Design between Time, Space and Technologies Camelia Chivăran, Sonia Capece
461	Speculative Physical Models Created Through a Robotic Process Sara Codarin, Karl Daubmann	552	The role of Design in telepresence robotics experience Claudio Germak, Lorenza Abbate
476	Teaching Design in the Age of Platforms: A Framework for Platform Education Xinyi Li	565	The Venice Backup: Case studies on the use of Virtual Preservation Techniques on Architectural Heritage sites in Venice, Italy Kai Reaver
488	The body as an artefact: a case of hand prosthesis Venere Ferraro, Silvia Ferraris, Lucia Rampino	587	Towards a visual-based survey on explainable machine learning Beatrice Gobbo
502	The design of human machine interfaces: from data to risk prevention. Annalisa Di Roma, Alessandra Scarcelli	604	Toys and Play, Weapons and Warfare: Militarizing the Xbox Controller Rachel Berger
516	The Designer in the AI/Machine Learning Creation Process Frederique Krupa	619	Wearing the smart city: Supporting older adults to exercise by combining age-friendly environments and tailored digital public data Nicole Aimers, Alen Keirnan, Ann Borda, Sonja Pedell
526	The encounter between Design and Artificial Intelligence: how do we frame new approaches? Marzia Mortati		

CONTENTS

629	DESIGN CULTURE (OF) LANGUAGES	754	Data visualization as a qualitative driver in knowledge communication: an interpretative framework Giulia Ciliberto
631	A Sidewalk museum. Exhibiting the collective dimension of the moving image Nicolo Giacomo Ceccarelli, Marco Sironi, Sabrina Melis	771	Design and Cultural Sites: New signage methods and languages for fruition, accessibility and storytelling Monica Oddone, Irene Caputo, Marco Bozzola
645	Abstract to figurative, and everything in between: visual design approaches and linguistic codes of a traditional form of animated product. Vincenzo Maselli, Eleni Mouri	786	Design and the 'Magical magic'. Disney and history, perceived heritage and shared memory Luisa Chimenz
659	Al-Kafiye: A Symbol of Change Hala Abdel Malak	800	DEsign DEcide The sign Tsvetomira Girginova
688	Beyondstories. People Narrative makes a Territory Aureliano Capri, Valeria Michetti, Veneranda Carrino, Mauro Palatucci	811	Designing the Gross. In search for social inclusion Adrien Rigobello, Nadja Gaudillière-Jami
707	Brand in Product. The language of the brand to govern complexity Mario Rullo, Massimiliano Datti	828	Finding New Representations of Old Knowledge: a design study of visualizing I-Ching Yvette Shen
726	Creating Visual Identity as Constellation: Methodological Project for a Design Workshop Ximena Izquierdo, Magdalena Ballacey	843	Form is function. Ethics and aesthetics of digital technologies in inclusive interface design. Letizia Bollini

CONTENTS

852	<hr/> 'Graphicmance'. New Visual Languages between Design and Performance Giulia Scalera <hr/>	938	<hr/> Performativity as a language of sense-making for cultural service in local museum Shu Hongming, Eleonora Lupo <hr/>
865	<hr/> Inner Geographies as poetic-aesthetic knowing: the inspiration and manifestation of creative doings through an emotively-orientated sensory methodology Mizan Rambhoros <hr/>	950	<hr/> Solid perspectives and optical corrections of spaces in graphic & architectural design Tommaso Empler, Adriana Caldarone, Alexandra Fusinetti <hr/>
883	<hr/> Italian Pavillion at XXII Triennale di Milano Ilaria Bollati, Luisa Collina, Laura Daglio, Laura Galluzzo <hr/>	962	<hr/> Spatial construction for ideational meaning: An analysis of interior design students' multimodal projects. Andrew Gill, Giovanna Di Monte-Milner <hr/>
895	<hr/> Language and identity in new Italian design Stefano Follesa, Peian Yao <hr/>	976	<hr/> Tales of Surprise: Exploring Sense Making Processes Through User Narratives Miray Hamarat, Ozge Merzali Celikoglu <hr/>
906	<hr/> Metaphors as Knowledge Activators in Data Visualizations: the case of the Archipelago of Calvino's literary works Tommaso Elli, Maria de los Angeles Briones Rojas, Beatrice Gobbo, Margherita Parigini, Virginia Giustetto, Valeria Cavalloro, Michele Mauri <hr/>	992	<hr/> The Design of Politics: Understanding the Arrest of Cesare Battisti Through the New Media Factor Noemi Biasetton <hr/>
925	<hr/> Patient Autonomy Indicators: a knowledge visualization tool for patient autonomy support Wen Zhang, Yuan Liu, Li Hou <hr/>	1007	<hr/> The Enlightenment of the Contemporary Transformation of Chinese Traditional Visual Space Perception on Cultural Sustainability design for all Jixiang Jiang, Dong Tao <hr/>

CONTENTS

1021 The Interplay between Ethics and Aesthetics in Intelligent Systems-Users Interaction
Gabriele Barzilai

1034 The pluralistic aesthetics of nowadays design
Francesca La Rocca

1049 The role of vernacular typography in the linguistic landscape of multicultural Singapore: A multimodal analysis case study of a gentrified street
Min-Yee Angeline Yam

1063 The Threshold of Language: Design and Soma
Daniela Monasterios-Tan, Susan Sentler, Ginette Chittick

1082 Towards a new design culture of scientific production – Innovating the formats of scientific publication of design
Eleonora Lupo, Beatrice Gobbo, Emilio Lonardo

1098 Translation Design for medicine leaflets. Research and innovation.
Elena Caratti, Antonella Penati, Valeria Bucchetti

1115 Visual dialects. Exploring early design sketching in various design disciplines
John Daniel Öhring, Åsa Wikberg-Nilsson

1127 Visualizing Offshore Foreign Direct Investments: The Atlas of Offshore
Michele Mauri, María De Los Angeles Briones Rojas, Jonathan Gray, Daniel Haberly, Chris Anderson

1144 What does this symbol mean? Icons as a Language for Emergency
Rodrigo Ramirez

1159 Where methods meet form
Meret Ernst, Maya Ober

1175 DESIGN CULTURE (OF) LIFE

1177 Adopt a costumer - to design new processes and packagings
Maria Benedetta Spadolini, Chiara Olivastri

1190 Autonomy as a Design Principle: Service Design for the Technology Literacy of Older Adults
Houjiang Liu, Miso Kim, Canqun He, Tia Thomson

1208 Bio-revolutions: radical change, design cultures and non-humans
Carolina Ramirez-Figueroa, Luis Hernan

CONTENTS

1222	Cognitive Ergonomics Components for Analysis of User Interface in Healthcare Industry Mariia Zolotova, Angela Giambattista	1301	No more whining – natural smart textile Nuutinen Ana, Pietarine Heidi, Kunnas Susan , Korpinen Risto, Sipola Reeta
1238	Connect art and science for a functional biomimicry in design Andrea Forges Davanzati	1308	Paving the way to post-digital smart materials. Experiments on human perceptions of a bio-inspired cellulosebased responsive interface Stefano Parisi, Markus Holzbach, Valentina Rognoli
1244	Development of a test setup for validating a cognitive assessment platform within ICU's Muriel De Boeck, Philippe Jorens, Guido De Bruyne, Kristof Vaes	1325	The flow of emotions in co-creation Mariluz Soto, Caoimhe Isha Beaulé, Satu Anneli Miettinen
1256	Food design as a tool for social development: experimental study in the evaluation of child smell Lígia Afreixo, Francisco Providência, Sílvia Rocha	1337	The Food Futures Teaching Cluster. Food Culture, Visual Communication Design, and Collaboration Peter K. Chan, Ben McCorkle, Rick Livingston
1272	FUTUR.DRESS. The Superskin for the Human Body in nearspace Maria Antonietta Sbordone, Ilaria Giampetraglia, Alessandra De Luca	1351	The river and the revered: Tracing the impermanence of the land, the people and the embroidered Indrajit De, Saumya Pande
1286	Hybrid systems of human technological biological products: a road to a greater sustainability? Marco Marseglia, Francesco Cantini, Alessio Tanzini	1364	The Shape of Drugs: a matter of Human-Centred Design Antonella Valeria Penati, Silvia Luisa Pizzocaro, Carlo Emilio Standoli, Valeria Maria Iannilli

CONTENTS

1377	The Wicked Home: Living Space as Ecological Holobiont Rachel Armstrong, Rolf Hughes, Nel Janssens	1453	Amorphous Stacks: A Low-Tech Construction Method for Jointless Cast Structures Liqiong Huo, Jongwan Kwon
1392	Three Dimensional technologies: Digitising Nature Gregor MacGregor	1468	An Exploratory Study about Communicating 4D Printing between Product Designers and Manufacturing Engineers Faten Ezrin Azhar, Eujin Pei
1405	Towards Neurodesign. The Mental Effort in packaging design Alessio Paoletti, Lorenzo Imbesi, Angela Giambattista	1482	Biotextiles applied to everyday objects Viviana Quiña, José Francisco Alvarez Barreto, Cristina Muñoz Hidalgo
1413	"WIT" as a Sustainable Engine Overcoming Mind Fixation in Ideation Alon Weiss	1504	Claudio Alcorso and Post-war Textile Culture Tracey Sernack-Chee Quee
1425	DESIGN CULTURE (OF) MAKING	1521	Collaborative Capabilities: aural encounters in digital/analogue co-creative making George S. Jaramillo, Lynne J. Hocking-Mennie
1427	A designed generation: Maker's maturity and social responsibility Luca D'Elia	1535	Collaborative ontology design for Open Hardware and Open Design Massimo Menichinelli, Emilio Velis, Andre Rocha, Alessandra Schmidt
1438	Accumulation of empirical investigation into joint structures in wooden furniture design Yi Shiang Lin, Ming Huang Lin, Jen Kuan Yau	1551	Contemporary Spaces of Apparel Design: Embracing both Digital and Physical Environments Krissi Riewe

CONTENTS

1562	Design Cultures of Making: Fashion thinking as creative process and pedagogy Susan Postlethwaite	1625	I - D (I – Design _ Idiosyncratic Meta Design) Idiosyncratic Proceedings on Reading and Production Meta-Objects in Contemporary Industrial Design Mantikou Angeliki-Sofia, Farangas Athanasios, Zafeiropoulos Theodoros, Psychoulis Alexandros
1573	Design culture of playing. The musical instrument industry: an important culture of made in Italy. Marco Mancini	1640	If we can't make it together, we won't make it alone. The challenge and potential of collective making Lena Håkansson, Stephanie Carleklev, Stephan Hruza, Anna-Karin Arvidsson
1588	Digital encounters in the culture of textile making: developing a hybrid craftsmanship for textile design by fusing additive methods of surface fabrication with knitting technology Delia Dumitrescu	1652	Inter-Weaving Culture and Crafts in Design Education Puja Anand, Alok Bhasin, Priyanka Khattar
1600	Distributed design and production for distributed care. Investigation on materializing bottom-up open and indie innovation in the field of healthcare Patrizia Bolzan, Massimo Bianchini, Laura Cipriani, Stefano Maffei	1668	Learning through codesign toolkits. A case study on codesigning the cinema of the future Simone Taffe, Sonja Pedell
1614	Heterotopia of Space: How capitalism is alienating and controlling societies Sarah Khayat	1681	Letterpress: A Survey of Print Culture or an Immersive Learning Experience Alexander Cooper, Rose Gridneff, Andrew Haslam
		1695	Made by (Material) Frustration Arielle Blonder, Shira Shoval, Eran Sharon

CONTENTS

1711	Material culture(s). Research paths in an evolving material design culture, and the connected future designer's attitudes Doriana Dal Palù, Beatrice Lerma, Claudia De Giorgi	1799	Research on the Application of Lacquer Craft in Modern Accessories Tianxiao Xie
1724	Mind-mapping in design culture: A tool for ideation in graphic design education? Philip Jones, Marion Morrison	1811	The Emerging Fashion-Tech Paradigm in the Contemporary European Landscape Chiara Di Lodovico, Chiara Colombi
1738	New scenarios for developing cooperative platforms for local manufacturing Alberto Calleo, Giorgio Dall'Osso, Laura Succini, Michele Zannoni	1825	The evolving role of prototypes in design research: a discussion on terms and meanings Silvia D. Ferraris, Gabriele Barzilai
1752	Playing for change: designing a board game for the circular economy Thomas David Cockeram, Jessica Clare Robins, Emmanuel Tseklevs, Leon Cruickshank	1840	The Making of a Dress: Explicating the Implicit Processes Adrian Huang
1769	Progetto Glume: from milling waste to resource for new materials Danilo Perozzi, Laura Dominici, Elena Comino	1857	The shape of wellbeing: investigating an approach for the development of a design requirements framework for design for wellbeing projects Sandra Dittenberger
1785	Re-distributed manufacturing in makerspaces. Towards a model of sustainable production Louis Rose	1873	Weaving sequential changes – designing textiles with multiple embedded stages Riikka Talman

CONTENTS

1891 **DESIGN
CULTURE (OF)
MULTIPLICITY**

1893 Architectural Design Education as
an Agent of Change: The Case of
the Ultra-Orthodox Branch,
Jerusalem
Elissa Rosenberg

1904 “But I’m a lecturer not a
therapist”: Educational Coaching
– a proposed alternative
approach to supporting students
through their creative education
Gary Pritchard

1918 Decoding the birth of
transcultural fashion
Shipra Kukreja

1934 Design as a medium for an
informal learning. INDICOLearning
from the interface to the activity
Marina Puyuelo, Mónica Val,
Hugo Barros da Rochas

1946 De-stereotype UX Design –
Discussing and managing issues
related to the clustering of users
in the design of innovative
solutions
Margherita Pillan, Alessandra
Mazzola

1958 Framing diversity: designing
hearing aids from a deaf culture
perspective
Patrizia Marti

1979 Gazes and Gatekeeping:
Reconceptualising the entrance
portfolio in the post-colony
Diane Steyn

1994 Hybridity as a culture of making
Maya Ober, Nicole Schneider

2011 Hyper-Contextual Futures in
Mexico City
Paolo Cardini, Karla Paniagua

2025 Learning and Differences
reciprocally shared and validated:
A decade long Participatory
Design collaboration between KG
Elementary School and AD
University
Raymond Patrick Zachary
Camozzi, Helene Day Fraser,
Caylee Raber

2040 On (un)becoming in Design
Academia: A Coloured female’s
autoethnography
Cheri Hugo

2058 The Ethics of Knowing a Shared
Language and Intention in Design
Lisa Elzey Mercer, Terresa Moses

CONTENTS

2066 The Neighbourhood Home.
System of environments for plural
inclusion
Ilaria Longo, Sonia Massari,
Alessandro Spalletta

2081 Universal Visual Languages in a
Male-oriented Society
Valeria Bucchetti, Francesca
Casnati

2095 **DESIGN
CULTURE (OF)
NEW NORMAL**

2097 A Comparative Study of Online
Teaching Modes of Sino-Italian
School of Design: A Politecnico di
Milano, Tsinghua University, and
Tongji University perspective
Fan Chen, Lin Li

2107 A COVID-19 Horizon Scan Looking
for Post-Pandemic Implications
for Design
Marcus Foth, Glenda Amayo
Caldwell, Joel Fredericks

2126 A new way of perceiving the
locality: economic growth, social
inclusion, environmental
protection
Fabio Mongelli

2141 A Sustainable Jewellery Design
Practice for Psychological Health
after Covid-19
Huiyi Qu

2153 Autopoietic design; seven
components for a sustainable
future design model
Gonzalo Raineri Bernain

2165 Community-led design
capabilities during the COVID-19
pandemic and beyond
Mariana Fonseca Braga, Eduardo
Romeiro Filho, Haddon G.
Guimarães Pereira, Emmanuel
Tseklevs, Rosângela Míriam L. O.
Mendonça

2182 Cross-Team Brainstorming and a
Comparison of Online to Physical
Version
Heng-Yi Mie, Hsi-Jen Chen

2198 Design Education in a Pandemic
Context
Harald Skulberg

2210 Design for Sustainable
Healthcare. Cutting the impact of
medical products through
disposable packaging
Gabriele Maria Cito, Angela
Giambattista

CONTENTS

2227	Designing new learning experiences in pandemic time: how digital can support a new didactic in Service Design Andrea Taverna	2302	Identifying Factors for Designing a Successful Telemedical Training System for Remote Pediatric Physical Exams Elham Morshedzadeh, Ph.D., Andre Muelenaer, MD, Jr, MD, MS,, Michelle Morris, Dana Werlich, Margaret Nelson, MD.
2239	Ecosystem Framework for Community Life Circles based on Life Projects in the Post-COVID-19 Era Tao Chen, Yong-Ki Lee, Juyoung Chang	2316	Inter-University Design Workshop: plurality in design education Inés Alvarez-Icaza Longoria, Diego Alatorre Guzmán, René Harari Masri, Lucero Donaji De la Huerta Santaella, Ana Elena Hernández Palomino
2253	Expansive Video Capture – Up close, personal & specific tutoring “performances” Brendon Clark	2332	Kids-centered Pocket Park design. Well-being for children in the urban post-covid context. Benedetta Terenzi, Anna Laura Pisello
2265	Gamified e-Learning approached through Emotional Design in the Post-Covid-19 era Na Wei, Yong-Ki Lee, Juyoung Chang	2347	Nanomedicine and Tourism in the post-pandemic era: smart “mobility & health” through wearable design for lab-on-chips Claudio Gambardella, Pietro Ferraro, Assia D'Alesio
2275	Healthcare innovation during the pandemic time: digital technologies to enhance clinic 4.0 Stefania Palmieri, Mario Bisson, Alessandro Ianniello	2358	Post-pandemic medicines: towards a new normality Antonella Valeria Penati, Carlo Emilio Standoli, Patrizia Bolzan
2289	Hospitals’ decision-making regarding infrastructural adaptations in response to Covid-19 Pleuntje Jellema, Margo Annemans, Ann Heylighen	2372	Reaching Audiences in 2020 Sharon Hooper

CONTENTS

2387	(Re)envisioning the contribution of design to the sustainable transition of healthcare systems Amina Pereno	2487	Telemedicine, today more than ever. The ABBRACCI design concept for COVID-19 patient monitoring Alessia Buffagni, Martina Frausin
2404	Reinforcing Networks of Place-Based Care and Resilience Julie Van Oyen, Jacquie Shaw, Laura Kozak, Jean Chisholm	2500	The Challenges and Benefits of online Education and the possible impacts of the entry of IT firms in the education ecosystem Nayna Yadav
2419	Research on rapid mass production of emergency products based on FDM 3d printing Xueyan Wang, Dongmei Peng	2512	The design culture and the challenges of the new normal Nicola Morelli
2433	Semi-immersive Virtual Habitat to Enhance Relaxation in People with Dementia during COVID-19 Emergency Silvia Maria Gramegna	2524	The effects of eye expression on emotion perception Yi-Hsun Liu, Hsi-Jen Chen
2446	Shifting paradigms in Sustainable Fashion Design education: Studying implications & effectiveness of pedagogical methods adopted in a pandemic setting Pragya Sharma	2537	The value of design in the emergency-driven scenarios. Crafting Ecosystems with data Francesco Dell'Aglio, Enza Migliore, Chiara Scarpitti
2471	Strengthening city resilience through the re-orientation of a social innovation incubation programme in Covid-19 time. The case of 'The School of the Neighbourhoods' Marta Corubolo, Anna Meroni, Daniela Selloni	2551	Thinking With Card: Curriculum-Led Making Activities Integrated with Distance Learning Benjamin Hughes

CONTENTS

2569	Understanding public health communication design globally during the Covid-19 pandemic: The Good, the Bad and the Ugly Emmanuel Tseklevs, Mariana Fonseca Braga, Alejandro Moreno-Rangel, Linli Zhang, Mafe Salazar, Hannah Field, Hayley Alter	2630	Attractive Factors in the Experience of an Online User-supported Learning Platform Min-Yuan Ma, Hsin-Yi Huang, Eric Chen-F Hsieh
2594	"United in isolation. An online letterpress festival". A community response to the Covid-19 pandemic Andrea Vendetti, Elettra Scotucci	2650	City Branding and Fictional Layers: Reading Istanbul through Filming Locations Zeynep Arda, Onur Mengi, Deniz Deniz
2604	DESIGN CULTURE (OF) PROXIMITY	2667	Co-Design processes for the inclusiveness of Rome's temporary communities Gianni Denaro, Luca D'Elia, Safouan Azouzi
2606	A Design Experience for Interactive Narrative Based on The User Behavior Yuan Yao, Haipeng Mi	2679	Co-designing the future of a public space and its related services. The case of the Reggio Emilia Ducal Palace and its park Marta Corubolo, Anna Meroni, Daniela Selloni
2619	An answer to the complex representation of territory. The fertile ground of mnemotopes and design of communication. Clorinda Sissi Galasso, Giovanni Baule	2694	Collaborative Futures: a pedagogical model for delivering future-focused and citizen-centred design education Marianne McAra, Kirsty Ross
		2710	Communicating social values to children using design solutions Laura Giraldi, Marta Maini, Francesca Morelli

CONTENTS

2720	Creating an inclusive learning environment to support transformative learning and encourage upward educational mobility opportunities for economically or academically under-resourced design students Michal Rotberg	2800	Design projects as drivers for organisational change in the public sector Felicitas Schmittinger, Alessandro Deserti, Francesca Rizzo
2736	Cultural Differences as Challenges and Design Drivers in the Development of Smart Assistive Technology for an Ageing Society Danying Yang, Louise Moody	2813	Design when you are the other 90%, a student's perspective Kyle Graham Brand
2752	Data visualization and knowledge sharing in participatory design to improve people liveability in urban places Giovanni Borga, Massimiliano Condotta, Chiara Scanagatta	2826	Design with Social Justice in Mind. The Case Study of Furniture Design in Elementary Schools Caroline Gagnon, Claudie Rousseau, Thomas Coulombe-Morency, Sonia Cadoret, Colin Côté
2768	Democratizing design: lessons from a case study in the Alpine area Daniele Busciantella Ricci, Ilaria Argenziano, Marta Gandolfi, Michela Ventin	2846	Evolving future city-based retailing via design thinking: A Chinese hybrid model approach Yujia Huang, David Hands, Rachel Cooper, Nick Dunn
2786	Design for Promoting Pro-environmental Behaviours of the Georgian Domestic Workers in Ankara Ayşe Kaplan, Lilyana Yazirlioğlu	2862	Feeling Endem. How travel enhances applied-autonomy in spatial design Hans Venhuizen
		2878	Global Proximity: case studies of international and interdisciplinary collaboration between the USA, Italy, Guyana and Japan Valeria Albani, Paolo Cardini

Cooperatives enterprise, incubators for the co-design of a new organizational and management model for sustainable development.

Caterina Rosini^{*a}, Silvia Barbero^a,

^aPolitecnico di Torino

*caterina.rosini@polito.it

Abstract | In the global economic context, cooperative enterprises have a considerable impact, with approximately one billion people worldwide estimated to be members of cooperatives (ICA e International Cooperative Alliance, 2015). In the historical evolution of the cooperative enterprise, they were born progressively, different typologies according to the most emerging collective problems (Depedri & Turri, 2015). However, the profound changes in the socio-economic context have expanded the emerging social needs, resulting in greater complexity that has challenged the established resilience of cooperatives. This complexity has led to the creation of a study based on the approach of Systemic Design (SD). Thanks to the primary tool of SD, the Holistic Diagnosis (HD), is possible to determine the current scenario and its complexity. The first phase of analysis of the context of reference is viewed from multiple points of view, such as economy, society, demography, and culture to identify strengths. With this background, the aim of this study is to define the first basis to design a new organizational model for social cooperatives, in the Italian context, to face the actual fluid situation. Specifically, the study highlights the cooperatives hidden potentialities to improve the structure of the organization and provide effective answers within the economic context. The HD is the first step to develop new organizational model for cooperative enterprises to be replicated on similar business models. To reach this goal a literature review is settle to highlight the actual gaps and a case study is analyzed in depth in order to obtain original data and validate the first hypothesis.

KEYWORDS | SOCIAL COOPERATIVES, HOLISTIC ANALYSIS, ALTERNATIVE APPROACHES, SYSTEMIC DESIGN

Introduction

In Europe, the term social enterprise refers to those enterprises defined as organisations whose mission is to produce goods and services to meet the needs of local communities, social groups and people, sometimes in fragile conditions. In every European region, these enterprises have different definitions and frameworks, some studies have investigated the birth and development of this type of enterprise (Borzaga & Santuari, 1999; Barr, 1992).

However, the main reasons behind the birth of social enterprises can be identified in:

- market crises due to the lack of homogeneity of information between producers and consumers; social enterprises offer an alternative to government-led interventions by creating a more socially embedded, equitable economy (Ridley-Duff & Bull, 2015).
- inability of the welfare state to meet the needs of public services; social enterprises sell or offer social services, programs, and/or products to fulfil human needs, by addressing the social problems that humans face (Rasheda, 2019).
- Individuals and/or groups of people who take actions to meet their ethical, ideological or religious aims (Hansmann, 1980; Weisbrod, 1975; Costa, 2012).

The distinction between social enterprise and social cooperative has been the subject of different studies (Defourny, Nyssens & Brolis 2018; Linzalone, 2013; Chell, Nicolopoulou & Karataş-Özkan, 2010). The International Cooperative Alliance (ICA), whose task is to promote and strengthen autonomous cooperatives around the world, has come up against the difficulty of defining uniquely the form of the cooperative so as to reconcile all experiences on a global level (Vella, 2010). The first univocal definition was profiled at the 1996 Manchester Congress with the following description: "an autonomous association of people who come together voluntarily to meet their economic, social and cultural needs and aspirations through the creation of a jointly owned, democratically controlled enterprise". At the legislative level, cooperatives have been officially recognized in the European Union by Article 48 of the *Trattato di Roma*, which defined them as a specific type of "company". From this moment on, each member state has designed regulatory frameworks to protect the interests of members and third parties.

Among all the member states, Italy was the first to create *ad hoc* legislation to regulate this type of enterprise (Kerlin, 2006). With the law n.381/1991 art.7, the Italian normative defined social cooperatives as non-profit entities subject to an advantageous tax regime with the aim of "pursuing the general interest of the community to the human promotion and social integration of citizens". More in detail, Law 381/1991 distinguishes three types of social cooperatives: 1) Type A social cooperatives dealing with the management of social and health services, education, and cultural activities; 2) type B social cooperatives, which have the objective of introducing "disadvantaged individuals" into the world of work (at least the 30% of the cooperative's workers); 3) Type C social cooperatives represent a category made up of consortia of social cooperatives. The consortia may have different characteristics, of mutuality, territorial, cross-sector and experimentation for activities in new cooperative sectors (Borzaga, 1996; Borzaga & Janes, 2011).

In general, in Italy social cooperatives, even if they are not the predominant form of enterprise, still play an important role within the national economic context. According to the Euricse (European Research Institute on Cooperatives and Social Enterprises) report which examines both sectoral differences and the economic situation in national context, the number of social cooperatives in Italy is about 14,000. Although the Euricse survey is among the most accurate, it remains difficult to make a clear distinction between type A and type B cooperatives. However, to date, the Italian National Institute of Statistics (ISTAT) remains the main source for making historical comparisons between data, to frame with growth percentages, the phenomenon of social cooperatives in Italy, for example, referring to ISTAT data we know that in 2015 working cooperatives and social cooperatives had generated the most value added of whole cooperative sector equal to 73%. The strong growth of social cooperatives is partly due to legal regulation and partly to the growing demand for welfare services both from the community and from the individual founders of social enterprises (Galera & Borzaga, 2009). In this regard, to correctly frame the flowering of these enterprises it is important to underline how towards the end of the twentieth century in Italy there was a crisis of the welfare state that had become inefficient and state centred. In this period of economic and social crisis, cooperative enterprises began to flourish. Thanks to their social mission, cooperatives became the answer to market and government failures, which were mainly due to budget cuts that led to an increase in unemployment with a subsequent growing economic disparity and an increase in people at risk of poverty and social exclusion (Riva & Garavaglia, 2016). In this context, the strength of cooperatives lies in their ability to promote an alternative model of growth and development to that commonly adopted by for-profit companies. The alternative model translates into the creation of opportunities for economic and social inclusion and the ability to adapt political decisions to the interests and values of stakeholders (Linzalone & Lerro, 2014; Kerlin 2006). Moreover, there is a large part of the literature that has highlighted the factors related to the resilience of social cooperatives (Cecop-Cicopa Europe, 2010; Euricse, 2015; Depedri, 2010). The human capital, among other factors, is a key element for the success of social enterprises. Indeed, much research has shown that workers in social cooperatives show greater commitment and loyalty. These elements translate into lower turnover but a high organizational effectiveness and productivity (Carpita & Golia S., 2012; Becchetti, Castriota & Tortia, 2013). In recent years, in order to withstand competition in the market with other types of companies, there has been increasing diversification within social cooperatives, which contributes to the development of multidisciplinary in terms of both professionalism and services offered (Euricse, 2015). On one hand, this multidisciplinary has contributed to increasing the resilience of cooperatives in the economic context, making them capable of facing and resisting the current economic crisis; on the other hand, a more varied composition, and a continuous drive for innovation in the organization flows allow a better adaptation to the social changes underway. Moreover, the merging capacity, the strengthening and renewal of the supply chains have contributed to increase productivity and competitiveness in this sector. In agreement with Shaw E. and Carter S. (2007) we can state that social cooperatives have been identified as an innovative model to address

emerging socio-economic needs. However, despite the positive aspects, some research and studies also explain the difficulties that social cooperatives have had to face in the process of affirmation (Linzone & Lerro, 2014; Thomas, 2004). Nevertheless, type B social cooperatives enjoy an advantageous tax regime, the outsourcing of public social services from social enterprises and the reduction of their budget are threatening the prosperity of cooperatives. Some studies have identified as major problems perceived by cooperatives: (i) the difficulty of opening to the market and becoming more independent from the public sector; (ii) the decrease in public procurement contracts by public authorities contributes to increased competition on cost-effectiveness by forcing cooperatives out of the market; (iii) the difficulty of obtaining financing and late payments by clients (Euricse, 2014; Riva & Garavaglia, 2016). Although in the past, social cooperatives have been fully able to respond to social needs, in the current context characterized by a strong complexity and also by a progressive reduction of resources, they are increasingly called upon to respond to new and particular needs (Linzone & Lerro A., 2014; Depedri & Turri, 2015).

In this framework, the present paper aims to study the current situation of Italian cooperatives not only in terms of growth and in terms of development, as already discussed in the literature through statistical, qualitative and quantitative studies. Rather, we want to investigate in deeper the internal organization and the problems related to the management of human and material resources. To this purpose, we will use the Systemic Design (SD) approach, an alternative business and design model able to provide interconnected solutions to the typical complexity of current situations, without neglecting social, environmental, and economic contexts. The analysis is strengthened from a real case study, a cooperative in Northern Italy, in order to work with primary and original data, like the historical evolution, the sectors of activity, the internal structure and the organizational flows of the work, and so on. The first step in the SD methodology is the Holistic Diagnosis (HD) to map the current scenario in all its complexity. Since the HD requires a deep level of detail, we decided to start with a single case study to use it as a reference to develop the analysis of other comparative case studies in the future, especially outside of Italy in order to have a more European scenario. The result that the study wants to achieve is to understand what are the critical issues in the current organizational model of the social cooperative, with respect to the new needs of the economic and social context. Once the criticalities of the current model and the needs of the reference context have been identified, we will proceed with the SD methodology in order to design a new model of social enterprise organization that can be replicated also on other similar realities. A fundamental aspect is also to facilitate the birth of new synergies that can involve not only public administrations but also private subjects, single citizens, or companies. The limits of the research are mainly related to the difficulty of finding all the data necessary to carry out an accurate mapping of the cooperative under examination. In fact, the cooperative in question has been in business for 30 years and has gone through many different phases that have brought with them changes in human resources and activities. In addition, there is another difficulty in obtaining information on the organisational flows of the work due to defined but not so rigidly defined roles within the cooperative as in a for-profit company, which makes the

changeover and maintenance of information more dispersive. However, we feel that by applying the SD methodology we could make a significant contribution in the innovating sector. We aim to increase knowledge about social cooperatives as an innovative business model aimed at meeting the emerging needs of today's society and to develop a new organizational strategy that meets both economic growth and workers' needs.

Method

For many years, there has been a concern to understand the growth of social cooperatives and their development in different territories. Some research has adopted qualitative methods to explore the co-evolution of social enterprises and the welfare state in Italy (Testi, Bellucci & Biggeri, 2017; Corbie, 2012). Different methods have been proposed to assess the economic benefits that these enterprises are able to achieve (Kohonen, 2012; Arogyaswamy, 2017; Cordes, 2017; Gordon, Wilson & Tonner, 2018). However, given the strong growth and development of social cooperatives and because of the difficulty in finding financing for their activities, impact assessment has become a much more discussed topic in recent years. In fact, quantitatively assessing the social impact of a cooperative can serve both the financiers, as a basis for evaluation, and the social enterprises themselves, to understand if their work is working and if it meets its objectives. The literature has developed a lot on this issue, applying different methodologies, for example, the activities and outputs created (i.e. jobs, tangible products, cost reduction...) have been examined and evaluated as main indicators of benefit delivery or results (Olsen & Galimidi, 2009). Then there are approaches such as Social Return on Investment (SROI) and Blended Value Accounting that seek to combine financial value with social value to define a single parameter that represents the company as a whole (Kroeger & Weber, 2015). Therefore, we want to try to go beyond the evaluation of the most easily measurable or immediate results (Arogyaswamy, 2017), because these types of evaluation have a big limit in the field of social cooperatives, and especially type B social cooperatives: it is not always possible to give back the results of an activity in monetary terms. For example, the inclusion of a disadvantaged person in the labour market can be evaluated in economic terms as a monetary amount saved to the state for the economic support of that individual. However, being able to assess how long the individual will remain in the labour market or whether or not he or she will have negative effects is not taken into account. In relation to this, it is therefore useful to ask whether it is no longer necessary for type B social cooperatives to talk about social impact monitoring rather than evaluation.

According to what has been described, in the current framework of cooperative enterprises there is a fair degree of complexity both in terms of what to assess and how best to assess it. The aim of the paper is to investigate through SD the complexity of the relationships between the company, the workers and the results achieved, finally defining a new system based on social, environmental and economic sustainability. The SD is an alternative design approach able to provide interconnected solutions to the complexity that characterizes the current situations, including in this process also the economic, social, and environmental contexts (Battistoni, Giraldo Nohra & Barbero, 2019). For our study and for the promotion of

an even stronger social cohesion and flourishing of local economies, the SD intervenes with the HD. The HD is an analysis process that determines the context of the system, considering both the quantitative and qualitative characteristics of the scenario under examination. Through the data collected through HD, problems and levers for change are identified. The next step will then be to define guidelines for co-designing a new system whose results are accessible and understandable to all stakeholders.

The HD, applied to our case study, is divided into two steps: the first involves in-depth analysis of the cooperative's internal relations and its operational context; the second is divided into top-down and bottom-up analysis to map the relationships with the entire value chain. Initially, we proceed to analyse the current organizational forms of workflows and the policies in place, the basic activities in the cooperative's sectors of reference and, finally, we identify all the potentialities that can be stimulated to promote sustainable development.

Specifically, phase 1:

We analyse the cooperative enterprise from its birth and historical evolution, then we examine the organizational structure from multiple points of view: workers' composition by age, cultural and economic dimension, scope of intervention. The data are collected directly at source thanks to the collaboration with the cooperative under examination and with its members. The information collected shows that the co-operative has most workers with fixed-term contracts and the majority are of Italian nationality; in fact, only 13% of the workers are of foreign origin (Fig.1). The average age of the workers is quite high, more than half of them are over 50 years old, and this factor has been identified as an influential aspect in the cooperative's capacity for growth and development. Having an older workforce implies greater difficulties in implementing internal changes especially about the digitalisation of processes and the transfer of knowledge. Most of the workforce is male, but this is due to the types of work carried out which often require greater physical strength but in no way attributable to discriminatory issues (Fig.2). In this context, the most important factor is the type of people the co-operative hires to fulfil its social mission. A 30% of the workers fall into the category of "socially disadvantaged people", which according to Italian law includes ex-prisoners, ex-alcoholics, and people with past drug addictions or in recovery, people with physical and mental disabilities. A peculiarity of the co-operative in question with respect to other co-operatives of the same type is that it chooses among disadvantaged people those who do not have any kind of work experience. In this framework, it is necessary to point out how much the social mission can influence and, in some ways, slow down the development of the organisation. Often these people are trained with the aim of making them acquire knowledge and skills useful for the job, but very often, they cannot sustain career transitions to roles that require responsibility. For the initial phase of historical analysis, interviews were carried out with the president of the cooperative and with the older members. For the organizational flows, information was collected through interviews with the department managers (Gardeners, Cemeteries, Selected waste collection) and took part in the weekly meetings in which the problems faced during the week were brought out. In this way, the designer has an immediate feedback on the validity of the data.

Once phase 1 is finished, it is necessary to frame the potentialities for the development and change of the cooperative and to do so it is essential to move on to phase 2: top-down and bottom-up analysis. In this phase, we proceed to map all the relationships with the stakeholders involved to identify the strengths and weaknesses on which to work together. HD requires a high degree of detail, fundamental to map and understand the intrinsic complexity of the study context. According to the HD results an high dependence from public institutions emerged, tangled relations with employment office for workers recruitment and internal resistance to change especially in the management sector.

Social Cooperative - Agridea

Fig.2 Workforce composition

Case Study

The type B social cooperative, Agridea is based in Turin. It was founded in 1992, following the publication of Law 381 of 1991, as a spin-off of another social cooperative called Stranidea. The initial sector of activity concerned the management and maintenance of green areas and there were five social workers in total. In 1993, the management of cemetery services was included, and so the second sector of activity was born. However, the first important development was in 1995 when Agridea was entrusted by the city of Turin with the management of urban green areas with a 2-year contract. Thanks to this first contract, the cooperative can obtain loans that it will use to buy the necessary equipment and to train its workers after this first big leap, the intention to create a more structured organization begins to manifest itself. In 2005, in collaboration with a Consortium, Agridea started to test the separated waste collection from the markets. The cooperative has grown significantly; to date it has about 70 workers and dependent members of which 30% are disadvantaged, as required by legal regulations. The governance model adopted by the cooperative is a traditional one, i.e. there is a board of directors, in this case represented by the president, vice-president and director, and a Board of Statutory Auditors, which supervises the work of the administrative body. The analysis of the organisational structure has shown that Agridea adopts a hierarchical model, which today is found almost exclusively in companies of minimum size. This model is functional thanks to the speed of transmission of orders and the transparency and clarity of relations. However, this organisation makes difficult the specialisation and the creation of "key roles".

Results and discussion

The growth of social cooperatives throughout Europe has gone hand in hand with the evolution of social problems. In Italy, too, this phenomenon has triggered a growing development of this type of enterprise. The SD approach with HD, promotes a multidisciplinary approach that brings together different stakeholders from different levels of the cooperative (managerial, operational, collaborative contacts with external bodies...) and provides the starting point to establish an innovative co-design. From the first part of the HD emerged a strong ability of Agridea to reinvent and develop itself in a quite autonomous way. In fact, since the birth of Agridea (1992), analysing its historical evolution, two years of economic loss have emerged, one in 2006 and one in 2010. The losses have always been absorbed in a maximum of two years and all sectors of activity have been maintained. This fact can be summed up in a good ability on the part of the management sector to manage difficult situations and to be able to recover. At the same time, we point out that in both years of crisis, all the workers remained in Agridea, no one resigned or was dismissed, a factor that shows a strong link on the part of the employees with the cooperative reality, which in turn contributes to strengthening the resilience of the cooperative. Another aspect that emerges is Agridea's willingness and ability to structure its

office staff in a more hierarchical way and with better defined roles, in the last few years this has improved the difficulties in managing the three sectors of activity: gardeners, cemeteries and selected waste collection. While on the one hand the hierarchical approach allowed a better management of tasks and work, on the other hand it contributed to a centralisation of responsibilities especially in the sector heads. This has led the co-operative to have a strong dependence on the people who incorporate these roles and who have become "indispensable" for the proper functioning of the whole organisation. Initially, what appeared to be an already consolidated organisation, HD brought to light the most hidden criticalities (Fig.3). When looking in detail at the organisation of a single sector, critical points emerged in the various areas. For example, the sector leaders must deal with the management system and the preparation of the daily programme according to the work to be carried out. The management system requires digital skills, which the managers have acquired through training. This training has not been extended to other workers who could potentially replace the current sector managers, so the co-operative does not currently have people capable of replacing the current managers in office tasks. This leads to two other closely related problems, a managerial culture, which is not encouraged and unilateral substitutability, i.e. the heads can fill in the gaps in the operational area, but the opposite is not possible. The head of each sector must interface with the administrative area for customers and suppliers, which constitutes an additional burden of tasks for the sector heads who, especially at certain times, e.g. holiday periods, monthly closures of activities in terms of budget, have an overload of tasks to perform that sometimes forces them to stay beyond the 8-hours working time. Finally, from the analysis of the production area and therefore, of the management of the workers, a strong operational-strategic dependence between the teams of workers and the sector manager emerged. There is a lack of intermediate responsibilities among workers who are unable or unwilling to take responsibility for operational and organisational choices even when they would be able to support them thanks to previous experience. Moreover, there is no horizontal mobility between sectors, although it could be activated in some tasks.

CASE STUDY

Social Cooperative - Agridea

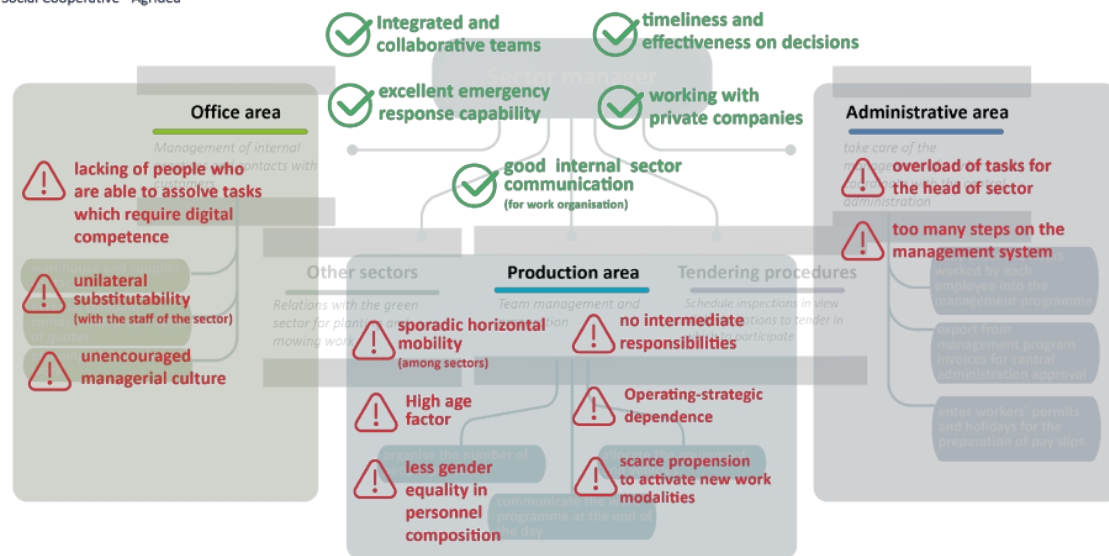

Fig.3 Criticalities and potentialities of a sector

Among the positive aspects that emerged, there is certainly good internal communication between sectors and efficient timing in making decisions, especially in response to work emergencies.

The teams are integrated and collaborative in two sectors (gardeners and cemeteries) while the sector of selected waste collection sometimes suffers from conflicts between workers. Furthermore, among the critical aspects that emerged between the first and second phases of the analysis, there are the difficulties in communicating changes and their acceptance. Communications between the sector managers and the workers are quite efficient but there is resistance for some subjects, especially in monitoring the proposed changes at organisation and management level. Interviews with the president and the workers' members showed that of the three sectors, the selected waste collection is the one that has had the lowest growth and for which there has been no news for many years. At the organisational level, there has been a strong propensity to solve problems in the immediate future, probably thanks to the solid experience of 30 years of work. At the same time, an inability to plan solutions to problems that are repeated cyclically (i.e. at seasonal level or annual) has also emerged. This may be partly due to have mostly works through tenders with variable durations: it is difficult to apply a method for solving problems that there is no certainty of having to deal with those problems again. Based on these assumptions, we decided to deal with the transmission of information as a first step to be able to implement organisational changes in the future. Given the nature of the company and its workers, it is indispensable that all the workers of the cooperative are aware of the processes active in the organisation of work, in this way it is possible to raise awareness towards the assumption of greater responsibility and collaboration.

In this perspective, an active training course was started which involved a first group of 30 people. At the end of the training, we expect to be able to identify among the workers those

who have shown greater predisposition in assuming roles of responsibility and who are evaluated by colleagues as reliable. The final intent will be to implement changes in the cooperative not only as regards the organization chart but also in the management of workflows. Moreover, the organizational changes should come through a co-design process within the workers.

Conclusion

The paper analysed through the methodology of SD the case study of the type B social cooperative, Agridea, in order to have some preliminary data and reflection on how the organizational model could be more effective in this times. The intent of mapping the growing complexity in the economic and social context that cooperative enterprises must face is to design a new organizational model concerning both the internal structure and therefore the roles and responsibilities of employees and external activities. With the new model, the aim is to develop new supply chains and new synergies, able to make the cooperative strong and resilient in the territory and in the context of action. This new type of social enterprise will be able to contribute to the development of new local economies, and the social impact will be greater as the relationships and actions undertaken increase. Above all, not only an innovative organizational model will be valuable outcomes of this research, but also the way in which this will be designed. This study aims to be the first step in the development of a project that will lead the Agridea cooperative to concretely implement the new model of organization. In addition, the paper contributes to the scientific literature by providing a deeper knowledge on the needs that social cooperatives must diversify within the national economic context. Moreover, it wants to contribute to the development of a more sustainable cooperative economy with full respect for the social mission.

About the Authors:

Caterina Rosini is a PhD student in Management Production and Design at the Politecnico di Torino (Department of Management and Production Engineering). Her doctoral research focuses on applying the Systemic Design in organizations, especially cooperatives, with the intent to boost the development of a sustainable enterprise model which respects the resources of our planet, both humans and materials.

Silvia Barbero, PhD, is an Associate Professor at Politecnico di Torino (Department of Architecture and Design). She is a lecturer of “Product Environmental Requirements” at the Design and Visual Communication degree and of “Open Systems” at the Systemic Design Master degree. She is also responsible for the stage & job in design curriculum. Her research mainly focuses on Systemic Design applied to territorial sustainable development.

Acknowledgements: We thank the constructive comment of the reviewers. A special thank goes to the Social Cooperative Agridea as the first case study of the research project and for its willingness in data collection.
